CHEVENING SCHOLARSHIP PROGRAM

The "Chevening Scholarship program", funded by the UK Government, aims to develop global leaders. It offers two types of awards: Chevening Scholarships and Chevening Fellowships. The program is available in 160 countries, including India, where it offers up to 40 fully paid scholarships and 50 fully paid fellowships each year. The scholarships are for outstanding Indian graduates with at least two years of work experience to pursue a one-year Master's degree in any subject at a recognized UK university. The fellowships are customized courses for mid-to-senior level professionals, lasting 8-12 weeks at a designated UK university.

Chevening Scholarships

Overview: Every year up to 40 scholars from India are awarded a fully funded scholarship (including tuition fee, travel and living expense) for a one year postgraduate course in the UK. The choice of course/university is decided by the scholar. **After completing their degrees, it is mandatory for the scholars return to their home countries to contribute to the development of their state and nation.** In their year in the UK, many engagements, visits, networking and volunteering opportunities are planned to help the scholars experience much more beyond the scope of academics.

Application Timeline – Applications for the 2024-25 session are currently open, with a deadline of November 7, 2023. Candidates will apply online. It is important to apply to UK universities concurrently, as admission to a UK university is a requirement for the Chevening scholarship. Shortlisted scholars will be interviewed in March next year and will leave for their Master's programme in September 2024.

Alumni - Chevening Scholars are high achievers working in a wide range of fields who demonstrate the qualities and ambition to rise to positions of leadership. The 3700 strong network of Chevening alumni in India includes 4 Ministers in the current Indian Cabinet, 60 current and former MPs, heads of industry, think tanks and media houses, along with prominent alumni working across a range of

businesses. This network offers networking events, professional development opportunities, and an annual conference to benefit your career. Scholars can also build lasting connections with professionals worldwide, gain valuable insights, and collaborate on various projects. Being part of the Chevening Alumni network allows person to give back by volunteering their time and expertise to support worthy causes and aspiring scholars.

Chevening Fellowships

Fellowships are customised courses aimed at mid-to-senior level professionals who are looking to expand their knowledge and expertise in their specific field of work. The programmes are tailored, short courses which usually run for 8-12 weeks at a designated UK University. The programme embraces a multi-disciplinary approach that includes a combination of formal course modules, lectures, group discussions, workshops, case based exercises, targeted visits and a host of meetings with relevant high-profile companies/organisations and sector experts. India offers the following Fellowships:

In India, there are four fellowship programs available.

1. **The Chevening Cyber Security Fellowship** is for professionals in the field of cyber security or cyber policy. Six fellows are sent every year to the UK for a 10 week fully funded residential programme delivered currently at Cranfield University at the Defence Academy of the United Kingdom. Fellows from the Government of India, the Indian Police Service, academia, the legal profession, entrepreneurs and industry are selected for this programme.
2. **The Chevening Gurukul Fellowship Programme for Leadership and Excellence** is for individuals with strong leadership skills from diverse backgrounds. 12 fellows are shortlisted representing diverse backgrounds including government, public and private sector, civil society, media and politics with strong and demonstrable leadership skills. The fellowship is a

fully funded twelve week residential programme at the University of Oxford which introduces India's future leaders with best practice case-studies of leadership in the fields of government, innovation, health and industry in the UK.

3. The Chevening Science and Innovation Leadership Fellowship is for professionals working in science, innovation, technology, and related fields. The ten week programme is delivered at St. Cross College, University of Oxford. Twelve Indians and two Sri Lankans are shortlisted every year, working in diverse fields of science, innovation, manufacturing, technology, business and related public administration with links to public policy.
4. The Chevening South Asia Journalism Fellowship Programme is for journalists from South Asia, including India, focusing on political, economic, and business journalism. The eight week fully funded residential programme at the University of Westminster focuses on Good Governance in a Changing World: Media, Politics and Society.

Overall, the Chevening program offers international students a unique opportunity for professional development, networking, and making a positive impact on the community.
