NO

.....

the talk was repetitive and although the topic of talk was one of concern the session did not discuss the actually important matters and rather focused on what was already known.

After learning those aspect I would like to apply these in learning so it would be great if collage initiate a competition based on these ai which is to be judged by ai experts

The talk was wonderful but it would have been better to clearly state the solutions on how we can make ourselves job ready.

Was a great session

It will be more interesting and effective if he gave the chance to other students except the volunteers also, a bit longer session needed on it

It was an excellent talk, get me know about current status on how thing could be turned upside-down in our favour

If the event was in video way then it will be more interesting

It was just an awesome experience.
