### Minutes of Board of Studies Meeting held on 02nd June 2023

The meeting of Board of Studies of the Civil Engineering department was held on Friday, 02<sup>nd</sup> June 2023 in online mode. Following were present:

1. Dr. A. K. Nema Professor, Civil Engg., IIT Delhi

(Expert nominated by V.C.)

2. Prof. Brind Kumar

(Subject Expert nominated by Academic Council)

Professor, Civil Engg., IIT BHU, Varanasi

3. Er. Alok Tiwari

(Representative from Alumni)

Principal Chief Safety Officer, SW Railway, Hubli

4. Dr. M. K. Trivedi

(Chairman BoS & Head of the department)

5. Prof. (Mrs.) Archana Tiwari

(Member, BOS)

6. Dr. S. K. Jain

(Member, BOS)

7. Dr. R. Kansal 8. Dr. S. Tiwari

(Member, BOS)

9. Prof. A. K. Dwivedi

(Member, BOS)

10. Prof. A. K. Saxena

(Member, BOS)

11. Prof. G. Bhadoriya

(Member, BOS)

(Member, BOS)

12. Prof. Aditya K. Agarwal

(Member, BOS)

13. Dr. Hemant Shrivastava

(Member, BOS)

14. Dr. Prachi Singh

(Member, BOS)

15. Dr. Abhilash Shukla

(Member, BOS)

Leave of absence was granted to the members who could not attend the meeting.

Following agendas were discussed & deliberated upon

| Item No. /<br>CE - 1 | To confirm the minutes of previous BoS meeting held in the month of December 2022   |  |  |  |
|----------------------|---|--|--|--|
|                      | Previous Board of Studies meeting minutes dated 14th December 2022 are confirmed.   |  |  |  |
| Item No. /<br>CE - 2 | To prepare and finalize the scheme structure of B.Tech. VII Semester with the provision of <i>Three Departmental Electives (DEs)</i> (in which two Departmental Elective is to be offered in online mode with credit transfer) and one Open Category (OC) Course for the batch admitted in 2020-21.  The finalized scheme of B.Tech VII Semester for 2020-21 admitted batch is attached   |  |  |  |
|                      | in Annexure – I.  |  |  |  |
| Item No. /<br>CE – 3 | To prepare and finalize the syllabus of courses to be offered (for the batch admitted in 2020-21) under Departmental Elective (DE) Course (in traditional mode) for B. Tech. VII Semester along with their COs  |  |  |  |
|                      | The following courses will be offered as Departmental Elective (DE) courses in traditional mode for VII semester students for 2020 admitted batch.  1. Hydraulic Structure (110731)  2. Advanced Structural Design (RCC) (110732)  3. Railway, Airport & Tunnel Engineering (110733)  The syllabus along with COs for these courses were discussed & finalized. The finalized syllabus is attached in Annexure – II and the same has been incorporated in the syllabus file for 2020 batch. |  |  |  |

The Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

### Item No. / CE – 4

To propose the list of courses which the students can opt from SWAYAM/NPTEL/MOOC based Platforms, to be offered in online mode under Departmental Elective (DE) Courses, with credit transfer in the B. Tech. VII Semester under the flexible curriculum (for the batch admitted in 2020-21)

Following SWAYAM/NPTEL courses are offered as Departmental Elective (DE) Courses in VII Semester for batch admitted in 2020-21 with credit transfer.

- 1. Municipal Solid Waste Management (110761)
- 2. Availability and Management of Groundwater Resources (110762)
- 3. Principles of Construction Management (110763)
- 4. Introduction to Multimodal Urban Transportation Systems (110764)
- 5. Foundation Engineering (110765)
- Remote Sensing & GIS (110766)

### Item No. / CE - 5

To prepare and finalize the syllabus of courses to be offered (for the batch admitted in 2020-21) under the Open Category (OC) Courses (in traditional mode) for B. Tech. VII semester students of other departments along with their COs

The following courses will be offered as Open Category (OC) courses in traditional mode for VII semester students for 2020 admitted batch.

- 1. Integrated Waste Management for Smart City (910211)
- Safety & Quality Management (910212)

The syllabus along with COs for these courses were discussed & finalized. The finalized syllabus is attached in Annexure – III and the same has been incorporated in the syllabus file for 2020 batch.

### Item No. / CE - 6

To prepare and finalize the Experiment list/ Lab manual for Departmental Laboratory Course (DLC) to be offered in B. Tech. VII semester (for the batch admitted in 2020-21)

The list of experiments for laboratory course to be offered in VII semester for 2020-21 admitted batch were finalized and are attached in Annexure – IV and the same has been incorporated in the syllabus file for 2020 batch.

### Item No. CE - 7

To propose the list of "Additional Courses" which can be opted for getting an

- (i) Honours (for students of the host department)
- (ii) Minor Specialization (for students of other departments)

[These will be offered through SWAYAM/NPTEL/MOOC based Platforms for the B.Tech. VII semester students (for the batch admitted in 2020-21)] and for B.Tech. V semester (for the batch admitted in 2021-22)]

Following SWAYAM/NPTEL courses are proposed as additional courses which can be opted for getting Minor Specialization during VII semester for 2020-21 admitted batch

- 1. Soil Mechanics / Geotechnical Engineering I (M110703)
- 2. Geometric Design of Highways (M110704)

Following SWAYAM/NPTEL courses were offered as additional courses for getting Minors during V semester for 2020-21 admitted batch and are running on SWAYAM/NPTEL platform in upcoming semester. Hence these courses are also offered as additive courses for getting Minors during VII Semester provided students can opt only those courses which they have not taken for any credit transfer facility earlier

1. Building Materials & Composites (M110501)

Selevil Enterphonartolent, MITS Gwali

3|Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

- 2. Strength of Materials (M110503)
- 3. Fluid Mechanics (M110504)

Following SWAYAM/NPTEL courses are proposed as additional courses which can be opted for getting Honours during VII semester for 2020-21 admitted batch

- 1. Bridge Engineering (H110704)
- 2. Ground Improvement (H110705)
- 3. Earthquake Geotechnical Engineering (H110706)
- 4. Admixtures & Special Concretes (H110707)
- 5. Dynamics of Structures (H110708)

Following SWAYAM/NPTEL courses were offered as additional courses for getting Honours during V semester for 2020-21 admitted batch and are running on SWAYAM/NPTEL platform in upcoming semester, Hence these courses are also offered as additive courses for getting Honours during VII Semester provided students can opt only those courses which they have not taken for any credit transfer facility earlier

- Integrated Waste Management for Smart City (H110501)
- 2. Matrix Method of Structural Analysis (H110502)

Following SWAYAM/NPTEL courses are proposed as additional courses which can be opted for getting Minor Specialization during V semester for 2021-22 admitted batch

- Building Materials & Composites (M110501)
- 2. Strength of Materials (M110503)
- 3. Fluid Mechanics (M110504)

Following SWAYAM/NPTEL courses are proposed as additional courses which can be opted for getting Honours during V semester for 2021-22 admitted batch

### TRACK 1: STRUCTURE ENGINEERING

- 1. Dynamics of Structures (H110507)
- 2. Admixtures & Special Concretes (H110508)
- Introduction to Engineering Seismology (H110509)

### TRACK 2: ENVIRONMENTAL ENGINEERING

- Municipal Solid Waste Management (H110510)
- Environmental Chemistry (H110511)
- 3. Availability and Management of Groundwater Resources (H110512)

### Item No. / CE - 8

To prepare and recommend the scheme structure of B. Tech. V Semester under the flexible curriculum (for the Batch admitted in 2021-22)

The finalized scheme of B.Tech V Semester for 2021-22 admitted batch is attached in Annexure - V

### Item No. / CE - 9

To prepare and recommend the syllabi for all Departmental Core (DC) Courses of B. Tech. V Semester (for the batch admitted in 2021-22) under the flexible curriculum along with their COs.

The syllabus along with COs for Departmental Core (DC) courses which are being offered in V Semester were discussed & finalized. The syllabus is attached in Annexure – VI and the same has been incorporated in the syllabus file for 2021 batch.

Item No. / CE - 10

To prepare and recommend the suggestive Experiment list/ Lab manual and list of projects which can be assigned under the 'Skill based mini-project' category in various laboratory component based courses to be offered in B. Tech. V Semester

Civil Engineering Department, MITS Gwalio

4 Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

|                       | (for the batch admitted in 2021-22).   |
|-----------------------|--|
|                       | The list of experiments for laboratory course to be offered in V semester for 2021-22 admitted batch were finalized along with the syllabi of courses offered in B.Tech V Semester as mentioned in agenda Item No. / CE - 9. The list of Skill based miniproject for the lab courses is being attached in Annexure - VII.                            |
| CE - 11               | To propose the list of courses from SWAYAM/NPTEL/MOOC Platforms to be offered (for the batch admitted in 2021-22) in online mode under Self-Learning/Presentation, in the B. Tech. V Semester  |
|                       | Following courses are offered Self-learning / Presentation courses for V semester through SWAYAM/NPTEL platform.  1. Principles and Application of Building Science 2. Geotechnical Engineering Laboratory. 3. Global Navigation Satellite Systems & Applications.   |
| Item No. /<br>CE - 12 | To review, prepare, finalize and recommend the Scheme & Syllabi (along with the Course Outcomes) of III semester B. Tech. programmes (for the batch admitted 2022-23 Session)  |
|                       | The Scheme & Syllabi for III Semester for B.Tech Civil Engineering for batch admitted in 2022-2023 was finalized. The scheme as well as syllabus is being attached in Annexure – VIII.   |
| Item No. /<br>CE - 13 | To review, prepare, finalize and recommend the list of experiments/ Lab manual and skill based mini projects for various laboratory courses to be offered in III Semester (for the batch admitted in 2022-23).   |
|                       | The list of experiments for laboratory course to be offered in III semester for 2022-23 admitted batch were finalized along with the syllabi of courses offered in B.Tech III Semester as mentioned in agenda Item No. / $CE-12$ . The list of Skill based mini project for the lab courses is being attached in Annexure – IX.                      |
| Item No. /<br>CE - 14 | To propose the list of courses from SWAYAM/NPTEL/MOOC Platforms to be offered (for the batch admitted in 2022-23) in online mode under Self-Learning/Presentation, in the III Semester Following courses are finalized as Self Learning/Presentation courses for III Semester through NPTEL platform  1. Water Society & Sustainability              |
|                       | GPS Surveying     C Programming & Assembly Language  |
| Item No. /<br>CE - 15 | To Review, prepare and recommend the scheme structure, Syllabi (along with the Course Outcomes), list of experiments/ Lab manual and skill based mini projects for various laboratory courses of <i>I semester B</i> . Tech. programmes (for the batch admitted in 2023-24 Session)  |
|                       | The Scheme & Syllabi for I Semester for B. Tech Civil Engineering for batch admitted in 2023-2024 was finalized. The list of experiments and skill based mini projects for lab courses offered in I Semester were also discussed and finalized along with the syllabus of courses. The scheme as well as syllabus is being attached in Annexure – X. |

### ANNEXURE - II

### SYLLABUS FOR DEPARTMENTAL ELECTIVE COURSES (DEs) TO BE OFFERRED IN VII SEMESTER

Course Code: 110731 Course Name: Hydraulic Structure

L T P Credit 3 0 0 3

### Course Objectives:

- 1) To study the different aspects of design of hydraulic structures.
- To build the necessary theoretical background for the selection of a suitable site for a dam and a suitable dam for a given site location.
- 3) To emphasize on the basic design principle of the gravity dam & earthen dam
- 4) To carry out the stability & seepage analysis of various types of dams.
- To provide knowledge on various hydraulic structures such as energy dissipaters, spillways & gates & understand their designs.
- To understand the design of cross drainage structures for uninterrupted water supply in natural channels and manmade canals.
- 7) To provide a basic knowledge on various types of hydropower plants and their components.

### Syllabus:

### Unit-I Gravity dams:

Design Criteria, forces acting on gravity dams, elementary profile, low and high gravity dams, stability analysis, evaluation of profile by method of zoning, practical profile, foundation treatment, construction joints, galleries in gravity dams.

### Unit-II Earth and Rock fill dams:

Earth Dams: Types, causes of failure and design criteria, soils suitable for earth dam construction, construction methods, foundation requirements, typical earth dam sections, estimation of seepage through and below the dam, seepage control, stability of slopes by slip circle method, pore pressures, sudden draw down, steady seepage and construction pore pressure condition.

Rock fill dams: Types, merits and demerits, conditions favourable for their adoption

### Unit-III Cross drainage works:

Types, selection of suitable type, design criteria, fluming of canal- Mitra & Chaturvedi methods. Design of Different types of CD works.

### Unit-IV Spillways, Energy dissipators and gates:

Ogee spillway and its design, details of syphon, shaft, chute and side channel spillways, emergency spillways. Principles of energy dissipation, Energy dissipators based on tail water rating curve and jump height curves, Spillway crest gates — vertical lift and radial gates, their design principles and details.

### Unit-V Hydropower Plants:

Hydropower development, assessment of power potential, types of hydropower plants, general features of hydro-electric schemes, selection of turbines, draft tubes, surge tanks, penstocks, power house dimensions, development of micro hydel stations, tidal plants, pumped storage plants and their details.

Civil Engineering Department, MITS Gwalior

111Pau

July

MS with

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Identify different components of hydro project.

CO2: Explain basic principles of designing hydropower plant & cross drainage works.

CO3: Solve problems of dam analysis, energy dissipators & cross drainage works.

CO4: Evaluate suitability of types of hydraulic structures.

CO5: Design various elements of hydraulic structures.

### Reference Books:

- 1. Engineering for Dams (Volumes 1, II & III) by Creager, Justin & Hinds
- 2. Hydroelectric Hand Book by Creager
- 3. Hydraulic Structures by Varshney
- 4. Irrigation & Water Power Engg. By Punmia& Pandey
- 5. Water Power Engineering by Dandekar
- 6. Irrigation Engineering & Hydraulic Structure by S.K. Garg.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

Course Code: 110732

Course Name: Advanced Structural Design (R.C.C.)

L T P Credit 3 0 0 3

### Course Objectives:

- To understand the behavior of RC structures like Retaining wall, Water tanks, Highway Bridges and prestressed concrete beams.
- To apply the codal provision for estimation of loads on Retaining wall. Water tanks. Highway Bridges and prestressed concrete beams sections
- To know analysis of Retaining walls. Water tanks, Highway Bridges and prestressed concrete beam sections subjected to realistic loads.
- To learn design of Retaining walls, Water tanks, Highway Bridges and prestressed concrete beam sections using Codal provisions.

### Syllabus:

### Unit-I

### Design of Water Tanks:

General design requirements; Design of circular tanks resting on ground; Design of rectangular tanks resting on ground; Design of under ground tanks.

### Unit-II

### Over Head Water tanks and Flat Slabs:

Overhead Tank: Intze type (Membrane analysis only), Design of Staging

Design of Flat slabs: (i) Direct design method and (ii) Equivalent frame method; Design Shear.

### Unit-III

### Earth Retaining Structures:

Types of retaining walls, Stability of retaining walls, Design of Cantilever type retaining wall; Design of Counterfort type retaining walls.

### Unit-IV

### Design of Bridges:

IRC loading for highway bridges, Design of Slab bridges for IRC Loads; Design of T-beams bridges for IRC Loads.

### Unit-V

### Prestressed Concrete:

Prestressing concepts, materials; systems of prestressing; prestress losses. Introduction to working & limit state design method for prestress beam sections.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Explain the structural behaviour of water retaining structures; earth retaining structures; bridges and Prestressed concrete structures.

CO2: Determine design forces in water retaining structures; earth retaining structures; highway bridges; and Prestressed sections.

CO3: Analyse the water retaining structures: earth retaining structures: highway bridges and Prestressed sections for realistic loadings.

CO4: Design economic and safe water retaining structures; earth retaining structures; highway bridges

Civil Engineering Department, MITS Gwalior

- 2. Reinforced Concrete Limit State Design by Ashok K. Jain, Nem Chand & Bros. Roorkee.
- 3. Reinforced Concrete Design by S. U. Pillai and D. Menon, Tata McGraw-Hill Publishing Company
- 4. Essentials of Bridge Engineering by D.J. Victor, Oxford and IBH publishers.
- 5. Design of Bridges by N.K. Raju, CBS Publishers
- 6. Prestressed Concrete by N.K. Raju, CBS Publishers
- 7. Advanced Reinforced Concrete Design by P. C. Varghese, Prentice Hall of India publisher
- 8. Prestressed concrete by T.Y. Lin & N.H. Burns, Wiley publisher

HAWA THE

[A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

### Course Code: 110733

### Course Name: Railway, Airport & Tunnel Engineering

L T P Credit 3 0 0 3

### Course Objectives:

- 1) To understand the requirements of airport, runway & taxi way.
- 2) To understand the requirement of lighting & signal & traffic control at airports.
- 3) To understand the geometrical elements of railway track.
- 4) To understand the properties of good ballast.
- 5) To understand the track alignment, super elevation, turnout, yards.
- 6) To understand the principles of signalling & interlocking.
- 7) To understand the construction of tunnels.

### Syllabus:

### Unit-I Introduction to Railway Engineering

Tractive resistance & Permanent way. Principles of Transportation, Transportation by Road, Railways, Airways, Waterways, their importance and limitations. Route surveys and alignment, railway track, development and gauges. Hauling capacity and tractive effort.

- (i) Rails- types, welding of rails, wear & tear of rails, rail creep ultrasonic Testing of Rails.
- (ii) Rail fastenings- types Fishplates, spikes bearing plates, chairs, keys, check and guard rails, Elastic Rail Clips (ERC), Vossloh fastening.
- (iii) Skeepers, types & comparison, requirement of a good skeeper, skeeper density, Turnouts.
- (iv) Ballast —Requirement of good ballast, various materials used as ballast, quantity of ballast, Ballast
   Cleaning.

Different methods of plate laying, material trains, calculation of materials required, relaying of track.

### Unit-II

Track alignment, Geometrical Design, Gradient & gray compensation, Super Elevation, Equilibrium, Cant and Cant deficiency, relationship of super elevation, gauge, speed & radius of curves, speed on curves, Limits of super elevation, Cant deficiency, Negative super elevation, curves, transition curves, necessity of points and crossing. Turnouts, Points of switches, Types of switches, crossing, calculation of turnouts, sleepers at points &crossing, Types of Track junctions. Types, locations, general equipments, layouts, marshalling yards. Definition, layout details, designs of simple turnouts.

Stations and Yards: Site selection for a Railway stations, Requirements of railway stations, junction station & determinals, location, layout & details, Types of signals in stations and yards, principles of signaling and inter-locking. Modern development in railways, Modernization of track for high speed, Maintenance of track, Track drainage.

### Unit - III Airport Planning, Runway & Taxiway

Airport site selection, air craft characteristic and their effects on runway alignments, wind rose diagrams, basic runway length and corrections, classification of airports. Geometrical elements: taxi ways and runways, pattern of runway capacity.

### Unit - IV Airport, Obstructions, Lightning & Traffic control

Zoning regulations, approach area, approach surface-imaginary, conical, horizontal, Rotating beacon, boundary lights, approach lights, runway and taxiway lighting etc. instrumental landing system, precision approach radar.

Civil Engineering Department, MITS Gwalior

15 Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

### Unit-V Tunnels

Selection of route, Engineering surveys, alignment, shape and size of tunnel, bridge action, pressure relief phenomenon, Tunnel approaches, Shafts, pilot shafts. Construction of tunnels in soft soil, hard soil and rock, Different types of lining, methods of lining, Mucking operation, Drainage and ventilation, Examples of existing important tunnels in India and abroad.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain the elements of airport planning, bridges & tunnels.
- CO 2: Design runway & taxiway system as per regulations.
- CO 3: Explain various elements of railway tracks, signalling, yards, bridges & tunnels.
- CO 4: Illustrate various gauge, signals, fasteners, turnouts, crossing etc.
- CO 5: Apply construction methods of railway tunnels.

### Text Books:

- 1. Airport Planning & Design, S. K. Khanna & M. G. Arora, Nem chand Publishers, 6th edition, 1999
- 2. Railway Engineering, Arora & Saxena, Dhanpat Rai & Sons, 2010

### Reference Books:

- 1. Airport Planning, Froesch, Charles, Andesite Press, 2017
- 2. The Planning & Design of Airports, Horonjeff Robert, MHE, 5th edition, 2010
- 3. Railway Engineering, S.C. Rangwala, Charotar Publication House, Anand, 2012
- 4. Railway Tack, K.F. Antia, New Book Company, 5th edition, 1960

### SYLLABUS FOR OPEN CATEGORY COURSES (OCs) TO BE OFFERRED IN VII SEMESTER

Course Code: 910211

Course Name: Integrated Waste Management for Smart City

L T P Credit 3 0 0 3

### Course Objectives:

- 1) To provide broad knowledge on various aspects of planning & implementation of waste management system in a smart city/town.
- 2) To understand the principles applied in waste management.
- 3) To understand various ways to collect, treat & disposal of waste.
- To understand various methods of energy recovery from waste.
- To understand various aspects of hazardous waste management, E-waste management, biomedical waste management etc.

### Syllabus:

### Unit I:

Introduction to waste management, classification of solid waste, objective of solid waste management, principles of integrated waste management, 3R policy, various laws & rules of waste management (MSW Rules, hazardous waste management rules, E-waste rules etc.), role of various agencies in planning of waste management system, swachh bharat mission and smart cities program — implementation, current status, challenges and future trend of waste management.

### Unit II:

Municipal solid waste - generation, composition, characterization, handling of waste at source, collection of waste - collection system, collection routes, collection equipments, transportation of waste, transfer stations, segregation and recycling of waste, disposal of waste through landfills

 types of landfills, planning & operation of landfills, leachate management & control of gases in landfills, environmental monitoring of landfills.

### Unit III:

Energy recovery from municipal solid waste - thermal conversion technologies, incineration, pyrolysis, gasification, environmental control system, biological & chemical conversion technologies, aerobic composting, anaerobic digestion, refuse derived fuels, other biological and chemical transformation methods,

### Unit IV:

Hazardous waste management - characteristics, source, health effects, physiochemical treatment methods of hazardous waste, disposal of hazardous waste, Biomedical waste management - sources, health effects, issues in India, challenges, handling of biomedical waste.

ivil Engineering Department, MITS Gwalior

18 Page

(A Govt. Aided UGC Autonomous Institute affiliated to RGPV, Bhopal)

### Unit V:

E-waste management – sources, health effects, issues in India, challenges, handling of E-waste. Plastic waste management – types of plastics, sources of plastic waste, impacts of plastic waste, plastic waste management practices. Management of construction & demolition wastes.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain the principles & concepts of waste management.
- CO 2: Apply various techniques of handling the waste.
- CO 3: Apply various techniques of energy recovery from waste.
- CO 4: Plan an effective & efficient waste management system.

### Text Books:

- Text Book of Solid Wastes Management, Iqbal H. Khan and Naved Ahsan, CBS Publishers, 1st edition 2012
- Integrated Solid Waste Management, Hilary Theisen and Samuel A, Vigil, George Tchobanoglous, McGraw Hill Yew York, 1993

### Reference Books:

- Environmental Engineering, Rowe, Peavy & Tchobanogolous, Tata McGraw Hill Publications,
- CPHEEO, Manual on Municipal Solid Waste management, Central Public Health and Environmental Engineering organization, Government of India, New Delhi, 2016
- 3. Solid Waste Engineering, Vesilind P.A., Worrel H. W. and Reinhard, Thomson Learning Inc. 2003

Me wai & main of great from

(A Govt. Aided UGC Autonomous Institute affiliated to RGPV, Bhopal)

Course Code: 910212

Course Name: Safety & Quality Management

L T P Credit 3 0 0 3

### Course Objectives:

- 1. To study the basics of quality and safety management.
- 2. To learn the code of practice in design and construction for quality standards.
- To understand and evaluate quality and safety management principles and best practices in construction.
- 4. To understand and evaluate safety management principles in construction;
- To acquire good basic practices for quality system and progress for quality assurance and quality improvement for construction companies.

### Syllabus:

### Unit-1

Quality Management: Introduction – Definitions and objectives, Factors influencing construction quality; Responsibilities and authority; Quality plan; Quality Management Guidelines; Quality circles; cost of quality and safety; Quality transition - quality control and inspection; quality assurance; total quality management-principles, tools and techniques; Planning and control of quality during design of structures; Tools and techniques for quality management.

### Unit - II

Quality Systems: Introduction - Quality system standard, ISO 9000 family of standards: Requirements-Preparing Quality System Documents: Quality related training; Implementing a Quality system; Third party Certification; Concepts of quality control-Objectives, definitions, and systems.

### Unit - III

Quality Planning: Quality Policy, Objectives and methods in Construction industry; Consumers satisfaction, Ergonomics, Time of Completion, Statistical tolerance, Taguchi's concept of quality; Inspection procedures-Processes and products (materials and machinery); Total cost implication,

### Quality Assurance and Quality Improvement Techniques:

Evolution of quality assurance, Objectives of quality assurance; Methods, Techniques and needs of quality assurance; Different aspects of quality Appraisals; Quality assurance in construction. Role of quality assurance in TQM process, Quality assurance standards. Developing and implementing quality assurance system. Quality Improvement Tools and Techniques, work study, method study and time study.

### Unit - IV

Safety management: Planning for safety provisions, budgeting for safety, safety policy. Safety audit, safety management practices, safety survey, safety inspection, safety sampling, evaluation of performance of supervisors on safety; Construction hazards and safety guidelines; Overall accident investigation process: Risk management; Prevention techniques for construction accidents; Site management with regard to safety recommendations; Training for safety awareness and implementation; Construction safety and health manual.

Civil Engineering Department, MITS Gwaliar

20 Page

### MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR (A Govt. Aided UGC Autonomous Institute affiliated to RGPV, Bhopal)

### Unit-V

Recent trends and Case studies: Quality and safety issues in steel construction, concrete construction (including pre-cast, and pre-stressed); computer aided hazard analysis.

### Course Outcomes:

After this course, students will be able to:

- CO 1: Explain the quality management systems and utilize the ISO 9000 family of standards.
- CO 2: Improve the quality of the project through tools and techniques.
- CO 3: Perform the environmental impact assessment (EIA) for construction projects towards quality.
- CO 4: Analyse the quality assurance and quality control, quality improvement tools andtechniques:
- CO 5: Evaluate the contract and inspection procedures.
- CO 6: Identify the safety management practices in construction industry.

### Reference Books:

- 1. B. G. Dale, Managing quality, 4th ed., Blackwell Publishing, Oxford, 2003.
- D. Reese and J. V. Eidson, Handbook of OSHA construction safety and health, 2 n d ed., CRC Press, Bocaaton, 2006.
- 3. F. Harris, R. McCaffer and F. Edum-Fotwe, Modern construction management. 6 t h ed., Blackwell Publishing, Oxford, 2006
- K. Knutson, C. J. Schexnayder, C. M. Fiori and R. Mayo, Construction management fundamentals, 2 nd ed., McGraw Hill, New York, 2008.
- 5. S. J. Holt, Principles of construction safety, Blackwell Publishing, Oxford, 2008.
- 6. The Management and Control of Quality: Sixth edition; James R.Evans, William M.Lindsay.
- Safety management by John V.Grimaldi Rollin H.Simonds.
- 8. ISO 9000 family of standard

### SYLLABUS/ EXPERIMENT LIST FOR DEPARTMENTAL LABORATORY COURSES (DLC) TO BE OFFERRED IN VII SEMESTER

Course Code: 110716

Course Name: Software Application for Solving Civil Engineering Problems

| L, | T | P | Credit |
|----|---|---|--------|
| 0  | 0 | 2 | 1      |

### Course Objectives:

- 1) To practice various software's used in civil engineering design & analysis.
- To practice MATLAB & QGIS.
- 3) To practice various other software's and its applications in civil engineering works.

### List of Experiments:

- 1. Design and analysis of reinforced concrete beam using STADD software.
- 2. Design and analysis of reinforced concrete slab using STADD software.
- 3. Design MATLAB code to develop load-response curve for different load conditions for a beam designed of experiment 1.
- 4. Application of QGIS in preparation of vector map of major city and preparation of land use and land cover maps.
- 5. Determination of critical network for a construction project using PRIMEVERA/ MS-Project.
- 6. To prepare an estimation of Multi-storey building and Road using MS-Excel.
- 7. Design water supply networks through Hardy Cross method. (Loops, EPANET and other software's).
- 8. Design Sewer networks using Hidra software,
- 9. Development of Geo-contor map by total station.
- 10. Estimation of axel load (msa) through IRC 37: 2015 using MS Excel.
- 11. Design and analysis of multi-storey building using E-tabs software.

In addition to above, various available open source software's will be used.

### Course Outcomes

Upon completion of the course, the students will be able to:

- CO 1: Design various beams, slabs & multistorey building's using various software's.
- CO 2: Design water supply & sewer networks using various software's.
- CO 3: Practice MS Excel in estimation works.
- CO 4: Produce land use land cover maps and geo contour maps using various software

CO 5: Practice Primavera and MS-Project softwares.

Civil Engineering Department MAPS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

Course Code: 110717 Course Name: Creative Problem Solving

> Credit 1

### Course Objectives:

- 1) To create an interest in students to provide solutions to various on field problems of civil engineering.
- 2) To provide solutions to various on field problems of civil engineering.

### List of Experiments

- 1. Traffic Survey of Major Road's in the city.
- 2. Design of Traffic Signal.
- 3. Performance evaluation of new building materials.
- 4. Determination of residual life of structure.
- 5. Identification of occupational diseases.
- 6. Identification of solid waste collection problems in a locality and subsequent proposal of the solutions to those problems.
- 7. Determination of surface roughness index of road.
- 8. Use of waste materials for construction of pavement layers.
- 9. Creation of data bank of water resources in the city.
- 10. Industrial visit and joint solution of problems in industry.

### Course Outcomes

Upon completion of the course, the students will be able to:

CO 1: Identify various on field problems.

CO 2: Practice various methods to solve problems.

CO 3: Produce solutions to various problems.

CO 4: Demonstrate various problems solving skills.

Engineering Department, MITS Gwalior

24 | Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

Course Code: 110718

Course Name: Summer Internship Project - III

| L. | T | P | Credit |
|----|---|---|--------|
| 0  | 0 | 4 | 2      |

### Course Objectives:

- 1) To develop an appreciation and importance of civil Engineering in developing the infrastructure.
- To develop an understanding regarding the various engineering principals to be used in the field Construction activities.
- 3) To emphasize on the use of the modern tools and plants used in the construction industry.
- 4) To build the necessary practical background and exposure to the field problems.
- 5) To develop a technical skill to prepare project documents.

### Syllabus:

Each candidate shall go for I month (4 week) on field training at different organizations / sites of his / her choice after completion of their 6th Semester exams (in summer vacations) and shall submit a detailed report after completion of training.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Observe various activities of civil construction works.

CO2: Examine the utility of general and specific equipments for construction.

CO3: Differentiate the construction projects individually and in team,

CO4: Develop the writing and communication skills for various engineering problems.

CO5: Adapt lifelong learning for benefit of society.

### ANNEXURE - VI

### SYLLABUS FOR COURSES TO BE OFFERRED IN V SEMESTER (2021-2022 ADMITTED BATCH)

Course Code: 110511 Course Name: Water Supply Engineering

> L T P Credit 2 1 2 4

### Courses Objectives:

Students will be able to understand

- The structure of drinking water supply systems, including water transport, treatment and distribution.
- 2) Water quantity and water quality criteria and standards, and their relation to public health.
- Operation and maintenance of water supply system components.
- 4) How to estimate water requirement of a city
- 5) How to design water treatment plant for urban & rural areas
- How to design water distribution network including pipe & appurtenances.

### Syllabus:

### Unit-I

Water demand (types variation, factors affecting it), Design period, population forecasting methods, estimation of water requirement of cities, Sources of Water, Source selection, underground water quality & quantity, characteristics of water (laboratory method & effects), water borne diseases, standards for drinking water.

### Unit-II

Water treatment flow diagram, design, construction, working of (Aerators, screens, plain sedimentation tank, tube settlers), coagulants & coagulation, flocculation, feeding and mixing of coagulants, optimum dose of coagulants, design & working of clarrifloculator, filtration (Theory & types). Design, operation & construction of slow sands & Rapid sand gravity filters, pressure filters.

### Unit-III

Disinfectants (types) & disinfection method of disinfection, chlorine & chlorine compounds, types of chlorination, Hardness (Causes & types), various methods of softening. Recarbonation, calculation of chemical requirements, Removal of colour, odor. Taste, Iron & manganese, algae removal, fluoridation / defluoridation, desalination, latest treatment techniques.

### Unit-IV

Intake structures (location, types & design), conduits for transporting water, forces on conduits, types of pressure pipe, joints, corrosion of pipe (causes & control), pipe appurtenances (design), pumping of water (numerical problems), types of pumps, Economical diameter of rising main (numerical), pumping stations.

Civil Engineering Department, MIT'S Gwalior

gum

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Unit-V

Requirement of good distribution system, layout of distribution, methods of distribution, Distribution reservoir and calculation of its capacity, fixing size of pipe, Analysis of pipe networks (Hardy cross method, Equivalent pipe method), appurtenances used in distribution networks, water supply & plumping system in building. Rural water supply.

### Courses Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain the concepts of water supply engineering.
- CO 2: Determine the requirements for safe supply of water.
- CO 3: Apply suitable water treatment technique based upon the available data.
- CO 4: Analyse a given water supply scheme.
- CO 5: Design a water supply system based upon the needs of society.

### Text Books:

- 1. Water Supply Engg., B. C. Punmia, Laxmi Publication (P) Ltd. New Delhi, 2016
- Water Supply Engg., S. K. Garg, Khanna Publishers New Delhi, 2017

### Reference Books:

- Water Supply & Sanitary Engg., G.S. Birdie, Dhanpat Rai Publishing Company, 2014
- Water & Waste Water Technology, Mark J Hammer, Prentice Hall of India, 6th edition, 2008
- 3. Environmental Engineering, Peavy, Rowe & Tchobanoglous, McGraw Hill Publication, 2017
- Manual of Water Supply and Treatment by CPHEEO, GOI, 2009

### List of Experiments:

- Determination of pH of a given water sample.
- 2. Determination of Total Solids, Dissolved Solids and Suspended Solids of water sample.
- Determination of Chloride concentration in water sample.
- 4. Determination of turbidity of water sample using turbidity meter.
- 5. Determination of acidity of the water sample.
- Determination of alkalinity of the water sample.
- 7. Determination of Hardness of the water sample.
- 8. Determination of D.O concentration of a given water sample.
- Determination of optimum dose of coagulants required for the treatment of a given water sample.
- 10. Determination of MPN of the given water sample.
- 11. Determination of Sulphate of a given water sample.
- 12. Determination of Nitrate of a given water sample.

Upon completion of the course, the students will be able to:

- CO 1: Follow sampling procedure & other guidelines for sampling & analysis of water samples.
- CO 2: Check various water quality parameters.
- CO 3: Improve the water quality by suggesting suitable corrective measures.

CO 4: Train others on various ways of improving the quality of water.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 110512

Course Name: Theory of Structure - II

L T P Credit 2 1 0 3

### Course Objectives:

- To understand the analytical procedure related to the analysis of building frame by some classical methods viz. Kani's methods and approximate methods of analysis.
- 2) To study the multi storey frames subjected to gravity loads and lateral loads
- 3) To understand matrix method and its application for computer based analysis of structure.
- 4) To understand the influence line concepts for indeterminate structures
- 5) To develop the skill to deals with the problems of moving loads in the structures & their analysis techniques.
- To understand the concepts of plastic analysis of structures.

### Syllabus:

### Unit-1

Moment distribution method in analysis of frames with sway, Analysis of box frames, analysis of beams and frames by Kani's methods.

### Unit - II

Analysis of tall frames, Calculation of various loads including wind and earthquake loads, Introduction to Code provisions for lateral loads. Approximate analysis of multistorey frames for vertical and lateral loads.

### Unit - III

Matrix Method of Structural Analysis: Force method and displacement method.

### Unit-IV

Rolling Load and Influence Lines

Maximum SF & BM curves for various types of Rolling loads, EUDL, Influence Lines for determinate structural beams, Trusses, Three Hinged Arches.

### Unit-V

Plastic analysis of beams & frames

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain various methods for analysis of structures and frames.
- CO 2: Analyse various loads on framed structures using codal provisions.
- CO 3: Analyse different type of structures for various load conditions by different methods.
- CO 4: Draw influence line diagrams for statically determinate & indeterminate structure.
- CO 5: Analyse beams & frames using plastic analysis.

### Text Books:

- 1. Intermediate structural analysis, Wang C.K., McGraw Hill, New York, 1984
- Basic Structural Analysis, Reddy C. S., Tata McGraw Hill Publishing Company, 2017
- Theory of Structures, S. Ramamrutham, R. Narayapan, Dhanpat Rai Publications, 9th edition.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 110513

Course Name: Structural Design & Drawing (RCC)

Credit 3

### Course Objectives:

- 1) To understand various design philosophies for RC components.
- 2) To study the desired properties of steel and concrete for use in Reinforced concrete,
- 3) To learn design of RC elements for flexure and deflection.
- 4) To learn design of RC elements for shear and bond as per relevant IS codes.
- To learn design of RC elements subjected to compression.

### Syllabus:

Unit-I

Design principles: Materials; Introduction to IS 456; Design philosophies: Working stress, Ultimate load and Limit state design

Singly reinforced beam sections: Analysis and design of singly reinforced rectangular beams: Lintel, Cantilever, Simply supported beams; Design for deflection.

### Unit-II Design of Beams:

Design for Shear; Design for bond; Doubly-reinforced and Flanged sections; Design of Continuous

### Unit-III Design of Slabs:

Slabs spanning in one direction: Cantilever, Simply supported and Continuous slabs; Slabs spanning in two directions: Circular slabs.

### Unit-IV Columns & Footing:

Design of short columns subjected to axial loads, axial load and bending moments (section with no tension); Design of long columns; Introduction to IS 13920; Design of isolated and combined footings.

### Unit-V Staircases:

Design of Staircases with waist slab: straight flight, dog legged, and open well staircase with different support conditions; Design of Tread-riser (without waist slab) staircase.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Apply the concepts of different design philosophies for analysis and design of singly reinforced concrete beams using relevant IS Codes.

CO2: Analyze and design singly, doubly and flanged sections for flexure, shear and bond using relevant

CO3: Design one way, two way and circular slabs using relevant IS Codes.

CO4: Analyze and design compression members and design footings using relevant IS codes.

CO5: Design different type of staircase using relevant IS codes

Civil Engineering Department, MITS Gwalior

34 Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 110514 Course Name: Fluid Mechanics - II

> Credit 3

### Course Objectives:

- 1) To develop an understanding of fluid flows patterns and learnto use boundary layer theory and drag.
- To apply theories of laminar & turbulent flow to solve typical pipe flow problems in the field.
- To apply boundary layer theory to estimate drag &lift for various shapes of the objects.
- 4) To classify the types of flows in open channel and also to design open channel sections in a most economical fashion with minimum wetted perimeter and learn about critical flows.
- 5) To study about non uniform flows in open channel and longitudinal slopes in open channel and also to learn about the characteristics of hydraulic jump.
- 6) To understand design philosophy of various types of pumps & turbines.

### Syllabus:

### Unit-I

Turbulent Flow: Laminar and turbulent boundary layers and laminar sub layer, hydro dynamically rough boundaries, velocity distribution in turbulent flow, Resistance of smooth and artificially roughened pipes, Commercial pipes, aging of pipes.

Pipe Flow Problems: Losses due to sudden expansion and contraction, losses in pipe fittings and valves, Concepts of equivalent length, Hydraulic and energy gradient lines, Siphon, Pipes in series, in parallel, Branching of pipes.(Hardy Cross method)

Pipe Network: Water hammer (only quick closure case) transmission of power.

### Unit - II Forces on immersed bodies:

Introduction, Force Exerted by a flowing fluid on a stationary body, Expression for Drag & Lift, Drag on a sphere, Terminal velocity of a Body, Drag on a cylinder. Introduction to Development of Lift on a Circular Cylinder and an Airfoil

### Unit - III Uniform Flow in open Channels:

Channel geometry and elements of channel section, Velocity distribution. Energy in open channel flow, Specific energy, Types of flow, Critical flow and its computations, Uniform flow and its computations, Chezy's and Manning's formulae, Determination of normal depth and velocity, Normal and critical slopes, Economical sections,

### Unit - IV Gradually varied flow

Basic assumptions and dynamic equations of gradually varied flow, characteristics analysis and computations of flow profiles, rapidly varied flow-hydraulic jump in rectangular channels and its basic characteristics, Surges in open channels.

### Unit - V Introduction to Fluid Machinery: Turbines & Pumps

Turbines: Classifications, definitions, Similarity laws, Specific speed and unit quantities, Pelton turbine - their construction and settings, Speed regulation, Dimensions of various elements. Action of jet, Torque, Power and efficiency for ideal case. Characteristics curves. Reaction turbines construction & setting. Draft tube theory. Runaway speed. Simple theory of design and characteristic curves,

Pumps: Principle of working & criteria for selection of different types of pump, viz. Centrifugal. Reciprocating.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Differentiate different types of fluid flow & fluid machinery,
- CO 2: Describe principles of analysis of fluid flow problem.
- CO 3: Explain basic principles for measurement of different forces acting on fluid body.
- CO 4: Analyze pipe flow, open channel flow problems & various characteristics of hydraulic machines.
- CO 5: Design open & closed conduit systems.

### Text Books:

- Fluid Mechanics, Modi & Seth, Standard Book house, Delhi, 21st edition, 2017 1.
- Open Chanel Flow, K. Subramanya, Tata McGraw Hill, New Delhi, 5th edition, 2019 2

Course Code: 110515 Course Name: Minor Project - I

| L | T | P | Credit |
|---|---|---|--------|
| 0 | 0 | 4 | 2      |

### Course Objectives:

- To develop an appreciation of civil engineering problems & have a feel of real life situations in planning & execution of projects.
- 2) To impart training of handling various types of civil engineering problems by use of conventional methods as well as software's.
- 3) To utilize the expertise in engineering to solve industry's technological problems.
- 4) To become innovative and professional in technology development, and system implementation.
- 5) To be able to function in their profession with social awareness and responsibility.
- 6) To be able to interact with their peers in industry and society as engineering professionals and leaders & inculcate a habit of working in a group.
- 7) Enable students to prepare professional reports for design projects and data presentation skill and to use computers and some computer graphics.

### Syllabus:

Each candidate shall work on an approved project of a public building or any other civil engineering work and shall submit design and a set of drawings.

### OR

Shall submit a detailed report of experimental work / software package on any specific problem of importance.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Recognize various engineering problems and techniques to solve them.
- CO 2: Reproduce the solution of the problems upon the need of society.
- CO 3: Cooperate to work within group.

My Mary

- CO 4: Develop the writing and communication skills for various engineering problems.
- CO 5: Display lifelong learning.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 110516

Course Name: Self Learning / Presentation

Credit

### Course Objectives:

- 1) To encourage students to read, study & understand different topics of civil engineering published in articles, literatures.
- 2) To help in presenting different topics of civil engineering and related subjects to supplement theoretical knowledge gained in class.
- 3) To make student acquire good oral & written communication skills.
- To promote the habit of lifelong learning.
- 5) To prepare students develop adequate soft skills to be able to present their topic effectively to listeners.

### Syllabus:

1. Any relevant topic related to civil engineering from within or beyond the syllabus through Swayam / NPTEL/MOOC.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Analyze contemporary issues in civil engineering & its allied areas through literature survey.
- CO 2: Distinguish state of art & relevance of the topic in national & international arena.
- CO 3: Demonstrate good oral & written communication skills.
- CO 4: Develop poster and power point presentations for effective communication.
- CO 5: Display lifelong learning.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 110517

Course Name: Summer Internship Project - II

| L | T | P | Credit |

### Course Objectives:

- 1) To make student acquire good oral & written communication skills.
- To promote the habit of lifelong learning.
- 3) To prepare students develop adequate soft skills to be able to present their topic effectively to

### Syllabus:

Each candidate shall have to undergo 15 days in house summer internship related to soft skills at the institute after the completion of their 4th Semester exams (in summer vacations) and after successful completion of internship they have to submit detailed report.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO 1: Develop the writing and communication skills for various engineering problems.

CO 2: Adapt lifelong learning for benefit of society.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### DATA SCIENCE (COURSE CODE 110520)

### COURSE OBJECTIVES:

- To provide the fundamental knowledge of Data Science.
- To present the basic representation and exploratory data analysis used in DataScience.
- · To understand the working of techniques used in Data Science.

### Unit 1

Need for data science, benefits and uses, facets of data, data science process, Introduction of basics python tool, Setting working Directory, Creating and saving a script file, File execution, removing variables from environment, clearing environment, Commenting script files, Variable creation, Data types and associated operations, Arithmetic and logical operators.

### Unit 2

Control structures, loop, Functions, data structures: Lists, Arrays, Tuples, Dictionary, Sets, NumPy library, Data Collection: Getting to know your data, Types of Data, Data collection strategies, Data Pre-processing, Feature engineering, Exploratory Data Analytics.

### Unit 3

Descriptive Statistics, Mean, Standard Deviation, Skewness and Kurtosis, inferential statistics: hypothesis testing, probability: probability theory, conditional probability, Pandas library, dataframe and dataframe related operations, Reading files.

### Unit 4

Data Cleaning and Preparation, Handling Missing Data, Data Transformations using pandas and sklearn library. Removing Duplicates, Replacing Values, Detecting Outliers. Data visualization on different dataset using matplotlib and seaborn libraries. Scatter plot, Line plot, Bar plot, Histogram, Box plot, Pair plot.

### Unit 5

Supervised learning: Regression, classification, Linear regression, logistic regression, decision tree, tree creation with entropy and information gain, ID3 algorithm, random forest, naïve bayes theorem, K-nearest neighbor and ensemble methods for solving real world problems, Unsupervised learning: Clustering, Reinforcement learning.

### BOOKS AND REFERENCES

- Mastering python for data science, Samir Madhavan
- 2. Introduction to linear algebra by Gilbert Strang.
- 3. Applied statistics and probability for engineers by Douglas Montgomery
- 4. Pattern Recognition and Machine Learning, Christopher M. Bishop

### COURSE OUTCOMES:

After completing the course, the student will be able to:

CO1: define different Data Science techniques.

CO2: illustrate various tools used for Data Science technique.

CO3: apply data visualization techniques to solve real world problems.

CO4: build exploratory data analysis for Data Science methods.

CO5: apply Data Science techniques for solving real world problems.

CO6, evaluate the performance of algorithms in data science.

Civil Engineering Department, MIT'S Gwalior

### List of Programs

- Perform creation, indexing, slicing, concatenation and repetition operations on Python built in data types: Strings, List, tuples, dictionary, set
- 2. Solve problems using decision and looping statements.
- Apply python built-in data types: Strings, List, tuples, dictionary, set and their methods to solve any given problem.
- 4. Handle numerical operations using math and random number functions
- 5. Maniulation of NumPy arrays Indexing, Slicing, Reshaping, Joining and Splitting.
- 6. Computation on NumPy arrays using universal functions and mathematical methods.
- 7. Import a CSV file and perform various statistical and comparison operations on rows/columns.
- 8. Create Pandas series and data-frame from various inputs.
- 9. Import any CSV file to Pandas data-frame and perform the following --
  - · Visualize the first and last 10 records
  - · Get the shape, index and column details
  - Select / Delete the rows / columns based on conditions
  - Perform ranking and sorting operations
  - Do required statistical operations on given columns
  - · Find the count and uniqueness of the given categorical values
  - Rename single / multiple files
- 10. Import any CSV file to Pandas data-frame and perform the following -
  - Handle missing data by detecting and dropping / filling missing values.
  - · Transform data using different methods
  - · Detect and filter outliers
  - Perform vectorized string operations on Pandas series
  - Visualize data using line plots, bar pots, histograms, density plots and scatter plots
- 11. Use the scikit-learn package in python to implement the regression model and its related methods

My words of the service of the servi

Civil Engineering Department, MITS Gwalior

Course Code: 1000006

Course Name: Disaster Management

| L | T | P |
|---|---|---|
| 2 | * |   |

### Course Objectives:

- i) To understand basic concepts in Disaster Management
- ii) To understand Definitions and Terminologies used in Disaster Management
- iii) To understand Types and Categories of Disasters
- iv) To understand the Challenges posed by Disaster
- v) To understand Impact of Disasters key skills

### Syllabus:

Unit 1: Introduction to disaster management, concepts and definitions: disaster, vulnerability, risk severity, frequency and details, capacity impact, prevention, mitigation.

Unit 2: Disasters - Disasters classification, demographic aspects (gender, age, special needs); hazard locations; global and national disaster trends, hazard and vulnerability profile of India.

Unit 3: Disaster Impacts - Disaster impact (environmental, physical, social, ecological, economic, political, etc.); health, psycho-social issues, impact of natural disasters (floods, draught, cyclones, volcanoes, earthquakes, tsunami, landslides etc.), impact of manmade disasters (industrial pollution, artificial flooding in urban areas, urban disasters, transportation accidents etc.).

Unit 4: Disaster Risk Reduction (DRR)- Disaster management cycle- its phases; prevention, mitigation, preparedness, relief and recovery; structural and non- structural measures; risk analysis, vulnerability and capacity assessment; early warning systems. Post disaster environmental response. Roles and responsibilities of government, community, local institutions. NGOs and other stakeholders: Policies and legislation for disaster management. DRR programmes in India and the activities of National Disaster Management Authority.

Unit 5: Disasters, Environment and Development – Factors affecting vulnerability such as impact of development projects and environmental modifications (including of dams, land use changes, urbanization etc.), sustainable and environmental friendly recovery; reconstruction and development methods.

### Course Outcomes:

After successful completion of the course, the students will be able to

CO1: Identify disaster prevention and mitigation approaches.

CO2: Classify global and national disasters, their trends and profiles.

CO3: Determine the impacts of various disasters.

CO4: Apply Disaster Risk Reduction in management.

CO5: Infer the linkage between disasters, environment and development.

Civil Engineering Department, M138 Gwallon

### DEPARTMENT OF CIVIL ENGINEERING

SYLLABUS B.Tech Civil Engineering

2022 ADMITTED BATCH

SEMESTER-III

My will dis Civil Engineering De

in the same

Zivil Engineering Department, MITS Gwallor

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 2110321

Course Name: Fluid Mechanics - I

L T P Credit 2 1 2 4

### Course Objectives:

- 1) To understand fluid properties and concept of fluid continuum.
- 2) To understand the concepts of kinematics & dynamics of fluid flow.
- 3) To apply fluid flow principles to various fluid flow problems.
- 4) To understand the mechanism of fluid measurement.
- 5) To understand the method of simulation & dimensional analysis.
- 6) To understand the concepts of laminar flow.

### Syllabus:

### Unit I

Review of Fluid Properties: Engineering units of measurement, density, specific weight, specific volume, specific gravity, surface tension, capillary, viscosity, bulk modulus of elasticity, pressure and vapour pressure.

<u>Fluid Statics:</u> Pressure at a point, pressure variation in static fluid, Absolute and gauge pressure, manometers, Forces on plane and curved surfaces (Problems – gravity dams and Tainter gates), buoyant force, Stability of floating and submerged bodies, Relative equilibrium.

### Unit II

Kinematics of Flow: Types of flow-ideal & real, steady and unsteady, uniform & non-uniform, one, two and three dimensional flow, path lines, streamlines, streamlines and stream tubes, continuity equation for one and three dimensional flow, rotational &irrotational flow, circulation, stagnation point, separation of flow, sources & sinks, velocity potential, stream function, flownets-their utility & method of drawing flownets.

### Unit III

<u>Dynamics of Flow:</u> Euler's equation of motion along a streamline and derivation of Bernoulli's equation, application of Bernoulli's equation, energy correction factor, linear momentum equation for steady flow, momentum equation, forces of fixed and moving vanes, velocity triangles.

<u>Fluid Measurements:</u> Velocity measurement, flow measurement (Orifices, nozzles, mouth pieces, orifice meter, Nozzle meter, venturimeter, weirs and notches).

### Unit IV

<u>Dimensional Analysis and Hydraulic Similitude:</u> Dimensional analysis, dimensional homogeneity, use of Buckingham-pie theorem, calculation of dimensionless numbers, similarity laws, specific model investigations (submerged bodies, partially submerged bodies, weirs, spillways, etc.)

### Unit V

Laminar Flow: Introduction to laminar, transition & turbulent flow, Reynolds experiment & Reynolds number, relation between shear & pressure gradient, laminar flow through circular pipes, laminar flow between parallel plates, laminar flow through porous media, stokes law, Bach wash processing. Instability of laminar flow to turbulent flow.

Civil Engineering Department, MIT'S Gwalior

(A Gost. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO I: Define various fluid properties & states of fluid.
- CO 2: Apply principles of fluid flow & dimensional analysis.
- CO 3: Solve fluid flow problems.
- CO 4: Analyze characteristics of fluid at rest, fluid at motion & dimensionless numbers.
- CO 5: Discriminate different types of fluid flow, measurement techniques & principles.
- CO 6: Apply the concepts of laminar flow in solving various fluid flow problems.

### Text Books:

- 1. Fluid Mechanics, Modi & Seth, Standard Book House, Delhi, 21st edition, 2018.
- 2. Fluid mechanics, Girde & Mirazgaonkar, SCI Tech Publishers, 2019
- 3. Fluid Mechanics, R.K. Bansal, Laxmi Publishers, 2015

### Reference Books:

- 1. Fluid Mechanics, A.K. Jain, Khanna Publishers, Delhi, 2014
- Fluid Mechanics, Streeter, McGraw Hill Publishers, 9th edition, 2017

### List of Experiments:

- 1. Determination of viscosity of fluid by redwood viscometer
- 2. Determination of metacentric height of floating body
- 3. Calibration of Venturimeter
- 4. Determination of Cc, Cd, Cv of Circular Orifice
- 5. Calibration of Mouthpiece
- 6. Calibration of Orifice Meter
- 7. Reynolds experiment for demonstration of stream lined & turbulent flow
- 8. Determination of Friction Factor for a pipe
- 9. Verification of Stoke's law.

### Course Outcomes:

Upon completion of practical course, the students will be able to:

- CO 1: Differentiate between different flow measurements devices.
- CO 2: Notice flow through pipes & fall velocity of particle.
- CO 3: Correct the instrumental errors.
- CO 4: Apply Stoke's law to calculate terminal velocity.

Mystalls of the second

Civil Engineering Department, MITS Gwalior,

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 2110322

Course Name: Theory of Structure - I

L T P Credit 2 1 0 3

### Course Objectives:

- 1) To develop an understanding of the behavior of structure under serviceability load.
- 2) To understand the mechanics of the material behavior of different type of structures.
- 3) To understand the concepts of analysis of indeterminate structures by various classical methods.
- 4) To make student aware of different methods of structural analysis.

### Syllabus:

### Unit-I

Deflection of beams: Energy Methods, Castigliano's theorem, method of real work, Principle of virtual work, method of virtual work for beam displacements.

### Unit-II

Deflection of determinate trusses, Analysis of indeterminate trusses, Principle of least work.

### Unit - III

<u>Indeterminate Structures -I:</u> Static and Kinematics indeterminacy, Analysis of Fixed and continuous beams by Theorem of three moments. Effect of sinking and rotation of supports.

### Unit-IV

Indeterminate Structures - II: Analysis of beams and analysis of frames (with and without sway) by slope Deflection method.

### Unit-V

Moment Distribution Method: Moment distribution method for analysis of beams and analysis of frames (without sway) Three hinged arches of different shapes. Eddy's Theorem. Two Hinged and Fixed Arches.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Classify different type of structures based on support conditions.
- CO 2: Explain various methods & principles for analysis of structures.
- CO 3: Apply various methods & principles for structural analysis.
- CO 4: Analyse various structures using various methods, principles & theorems.
- CO 5: Evaluate different methods of structural analysis.

### Text Books:

- 1. Basic Structural Analysis, Reddy C. S., Tata McGraw Hill Publishing Company, 2017
- 2 Theory of Structures, S. Ramamrutham, R. Narayanan, Dhanpat Rai Publications, 9th edition, 2014
- 3. Theory of Structures, B.C. Punmia, Laxmi Publications, 2017

### Reference Books:

 Structural Analysis – A Unified classical and matrix Approach, Ghali A & Neville M. Chapman and Hall, New York, 6th edition, 2009

Civil Engineering Department, MITS Gwalior,

(A Gost. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

- 2 Intermediate structural analysis, Wang C.K., McGraw Hill, New York, 1984
- 3. Structural Analysis, Aslam Kassimali, C. L. Publisher, 2014
- 4 Structural Analysis, R. C. Hibbler, Pearson Publication, 2017

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 2110323

Course Name: Geotechnical Engineering

| L | T | P | Credit |
|---|---|---|--------|
| 2 | 1 | 2 | 4      |

### Course Objectives:

- The students will get the basic knowledge about natural material like rocks and get acquainted with natural dynamic processes and their actions.
- The students will know the significance of geological investigations for civil engineering projects and site selection.
- 3) To inculcate the basic knowledge of soil such as its identification and classification, determination of various engineering properties and its suitability as a foundation/subgrade material.
- To develop an understanding of the relationships between physical characteristics and mechanical properties of soils by experimentally measuring them.
- To explain role of water in soil behavior and how soil stresses, permeability and quantity of seepage including flow net are estimated.
- 6) To determine shear parameters and stress changes in soil due to foundation loads & estimate themagnitude and time-rate of settlement due to consolidation.
- 7) To apply the principles of soil mechanics in stability analysis of slopes and settlement calculations.

### Syllabus:

### Unit-I Engineering geology & soil properties

Introduction to geology, mineralogy, petrology – Three-fold classification of rocks and their characteristic features. Structural geology - Types and classification of structures (Joints, Unconformities, Folds and faults) and their effect on civil engineering projects.

Introduction - Types of soils, their formation & deposition, basic definitions and relationships - Three phase system. Index properties of soil and their determination. Relationship between volume weight, void ratio-moisture content, moisture content-specific gravity, and unit weight- air voids etc.

Plasticity Characteristics of soil & indices and their determination, use of consistency limits, Classification of soil based on particle size and consistency limits, unified soil classification systems, Indian standard soil classification system, general characteristics of soil in different groups.

### Unit-II Soil Water and Consolidation:

Permeability of soil: Darcy law and its validity, Determination of permeability in laboratory and in field using various methods like constant head method, pumping tests etc. factors affecting permeability of soil. Seepage analysis – introduction, stream & potential functions, flow nets, uses of a flow net, Introduction to effective, neutral and total stresses, effect of water table, fluctuations of effective stress, effective stress in soils saturated by capillary action, seepage pressure, quick sand condition.

Consolidation - Introduction, Compressibility and consolidation, comparison between compaction and consolidation, initial, primary & secondary consolidation, spring analogy for primary consolidation, interpretation of consolidation test results, Terzaghi's Theory of consolidation, final settlement of soil deposits, Determination of consolidation settlement and secondary consolidation.

### Unit-III Stress Distribution in Soils:

Stresses in soil - Introduction, stresses due to point load, line load, strip load, uniformly loaded circular area, rectangular loaded area, influence factors, isobars, Boussinesq's equation, westergaard's analysis. Newmark's influence chart. Contract pressure under rigid & flexible area, computation of displacements from elastic theory.

Unit - IV Shear Strength of Soils:

Mohr Circle and its characteristics, principal planes, relation between major and minor principal stresses. Mohr-

Civil Engineering Department, MITS Gwalior

Ju 53 | Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Coulomb's theory, types of shear tests, direct shear test, merits of direct shear test, Triaxial compression test, test behaviour of UU, CU and CD tests, pore-pressure measurements, computation of effective shear strength parameters, unconfined compression test, vane shear test, critical void ratio, Liquefaction.

### Unit - V Stability of Slopes:

Introduction, Types of slopes and their failure mechanisms, factor of safety, analysis of Infinite and finite slopes, wedge failure, Swedish circle method, friction circle method, stability numbers and charts. Effect of ground water. Selection of shear strength parameters in slope stability analysis. Stability of Earth dams.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Evaluate different properties of rocks & soil and its classification.

CO2: Examine the flow and shear parameters & their effects on various types of soil.

CO3: Determine the stress distribution & shear failure by various methods.

CO4: Evaluate the shear strength parameter of soil by various methods.

CO5: Analyse the stability of slopes using various methods.

### Text Books:

- 1. Soil Mech. & Found. Engg., Dr. K.R. Arora, Std. Publishers Delhi, 7th Edition. 2014
- 2. Soil Mech. & Foundation, Dr. B.C. Punmia, Laxmi Publications, Delhi, 16th Edition, 2017
- 3. Basic & Applied Soil Mechanics, Gopal Ranjan, New Age International Publishers, 2016
- 4. Parbin Singh., "Engineering and General Geology", S. K. Kataria and Sons, 2009

### Reference Books:

- 1. Modern Geotech Engg, Dr. Aram Singh, 1BT Publishers, Delhi, 8th Edition, 2016
- 2. Geotech Engg., C. Venkatramaiah, New Age International Publishers, 16th Edition, 2018
- 3. Soil Testing for Engg., T.W. Lambe, John Wiley & Sons. Inc. 1969
- 4. Bangar, K.M, Principles of Engineering Geology, Standard Publishers Distributors, 1995, New Delhi

### List of Experiment's:

- 1. Moisture Content Determination. Oven Drying Method.
- 2. Grain Size Analysis Mechanical Method.
- Grain Size Analysis Hydrometer Method.
- 4. Liquid Limit, Plastic Limit, Shrinkage Limit Tests.
- In-Place Density tests Core Cutter Method, Sand Replacement Method.
- 6. Specific Gravity Tests.
- Permeability Tests, Variable Head Method.
- Compaction Test.
- 9. Unconfined Compression Test.
- 10. Direct Shear Test.
- 11. Triaxial Shear Test (UU)
- 12. Vane Shear Test.
- 13. Plate Load Test (Demonstration)
- 14. Consolidation Test.

Upon completion of practical course, the students will be able to:

- CO 1: Check physical properties of soil.
- CO 2: Check strength properties of soil.
- CO 3: Differentiate the flow properties and stresses of soil.
- CO 4: Check shear strength of soil.

Civil Engineering Department, MIT'S Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 2110324

Course Name: Transportation Engineering

L T P Credit 2 1 2 4

### Course Objectives:

- 1) To study the planning aspects of roads & highway.
- 2) To study the geometric design aspects of highway and road.
- 3) To know about pavement material and design.
- 4) To understand the construction process and methods of roads & highway.
- 5) To study about traffic characteristics and design of intersections.

### Syllabus:

### Unit - I Highway Development and Planning

Highway Development in India — Necessity for Highway Planning — Different Road Development Plans; Classification of Roads. Road Network Patterns — Highway Alignment-Factors affecting Alignment- Engineering Surveys.

### Unit - II Highway Geometric Design

Importance of Geometric Design – Design controls and Criteria – Highway Cross Section Elements – Sight Distance Elements – Stopping Sight Distance, Overtaking Sight Distance and Intermediate Sight Distance – Design of Horizontal Alignment – Design of Super elevation and Extra widening – Design of Transition Curves – Design of Vertical alignment – Gradients-Vertical curves.

### Unit - III Traffic Studies

Spot Speed Studies and Volume Studies, Speed and Delay Studies purpose, causes of delay, methods of conducting speed and delay studies, Origin and destination Studies (O & D): Various methods, collection and interpretation of data, Traffic Capacity Studies: Volume, density, basic practical and possible capacities, level of service, Parking Studies: Methods of parking studies, design of intersections at grade & grade separated.

### Unit -IV

Highway Construction Materials: Aggregates and their types, physical and engineering properties. Fillers, Bitumen, Characteristics, Emulsions and cutbacks, Basic tests on all materials.

Design of Flexible & Rigid Pavements: Introduction, flexible pavement, factors affecting design and performance, stress in flexible pavement, design of flexible pavement as per IRC, rigid pavements – components & functions, factors affecting design & performance of CC pavements, stress in rigid pavement, type of joints, dowel bar, tie bar and its functionalities.

### Unit - V Evaluation and Maintenance of Pavements

Pavement distress in flexible and rigid pavements, Pavement evaluation, structural evaluation, evaluation by deflection measurements. Strengthening of pavements, Types of maintenance, Importance of highway drainage, Surface and sub-surface drainage arrangements.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain the principles of highway planning & their geometrical design.
- CO 2: Evaluate physical properties of suitable highway engineering materials with drainage provisions,
- CO 3: Apply the concepts of traffic engineering in transportation planning.
- CO 4: Design pavements as per regulations.
- CO 5: Formulate the layers of pavement along with provisions of its drainage & maintenance.

### Text Books:

- Highway Engineering, S.K. Khanna & C.E.G. Justo, Nemchand Pub., 10th edition, 2018
- 2. Highway Engineering, Gurucharan Singh, Standard Publishers, 5th edition, 2006
- 3. Principles & Practices of Highway Engineering, L.R. Kadiyali, N.B.Lal, Khanna Publishers, 2016

### Reference Books:

- 1. Principles of Pavement Design, E.J. Yoder & M.W. Witzech, Wiley India, 2nd edition, 2011
- 2. Highway Engineering, O' Flaherty, Butterworth-Heinemann, 4th edition, 2002
- 3. Principles of Practice of Highway Engg., Sharma & Sharma, Asia Publishing House, 1965
- Analysis and Design of Pavements, Haung, Pearson, 2nd edition, 2004

### List of Experiments:

- 1. Aggregate Crushing Value Test
- 2. Determination of Aggregate Impact Value
- 3. Determination of Los Angeles Abrasion Value
- 4. Determination of flakiness index and elongation index of aggregates.
- 5. Determination of California Bearing Ratio Value
- 6. Determination of Penetration Value of Bitumen
- Determination of Viscosity of Bituminous Material
- 8. Determination of Softening Point of Bituminous Material
- Determination of Ductility of the Bitumen
- 10. Determination of Flash Point and Fire Point of Bituminous Material
- 11. Determination of Bitumen Content by Centrifuge Extractor
- 12. Determination of Stripping Value of Road Aggregate
- 13. Determination of Marshall Stability Value for Bitumen.

### Course Outcomes:

Upon completion of the practical course, the students will be able to:

- CO 1: Select suitable aggregate material by testing the physical properties.
- CO 2: Determine properties of bitumen and its grade.
- CO 3: Determine CBR value of material for subgrade and subsequent layers of pavement.
- CO 4: Design job mix formula for bituminous surface using Marshal Stability test

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 2110325 Course Name: Self Learning / Presentation

> L T P Credit 0 0 2 1

### Course Objectives:

- 1) To encourage students to read, study & understand different topics of civil engineering published in articles, literatures,
- To help in presenting different topics of civil engineering and related subjects to supplement theoretical knowledge gained in class.
- 3) To make student acquire good oral & written communication skills.
- 4) To promote the habit of life long learning.
- To prepare students develop adequate soft skills to be able to present their topic effectively to listeners.

### Syllabus:

 Any relevant topic related to civil engineering from within or beyond the syllabus through Swayam / NPTEL /MOOC.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO1: Analyze contemporary issues in civil engineering & its allied areas through literature survey.
- CO2: Distinguish state of art & relevance of the topic in national & international arena.
- CO3: Demonstrate good oral & written communication skills.
- CO4: Develop poster and power point presentations for effective communication.
- CO5: Display lifelong learning,

Civil Engineering Department, MITS Gwalior

Course Code: 2110326

Course Name: Summer Internship Project - I

| L | T | P | Credit |
|---|---|---|--------|
| 0 | 0 | 4 | 2      |

### Course Objectives:

- 1) To encourage students to read, study & understand different topics of civil engineering
- 2) To make student acquire good oral & written communication skills.
- 3) To promote the habit of lifelong learning.

### Syllabus:

Each candidate shall have to undergo 15 days in-house summer internship at the institute after the completion of their 2<sup>nd</sup> Semester exams (in summer vacations). Candidate can choose from various modules which are offered by the institute and after successful completion of internship they have to submit detailed report.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Observe various activities in field.

Me winds

CO2: Examine the utility of general and specific equipments for construction.

CO3: Differentiate the construction projects individually and in team.

CO4: Develop the writing and communication skills for various engineering problems.

CO5: Adapt lifelong learning for benefit of society.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 1000005

### Course Name: Project Management and Financing

L T P Credit 2 0 0 GRADE

### Course Objectives:

- 1) To know about project, its attributes and essentials of project planning
- 2) To develop the project network
- 3) To take rational decisions using project networks for successful completion of the projects
- 4) To decide about about rational utilization of resources in project.
- 5) To have an elementary idea of finances involved in a project and managing it

### Unit I:

### Project Planning:

Introduction to Project Management, Difference between Project and Production, Attributes of a Project: Time, Cost, Quality and Safety, Stakeholders of a Project, Project life cycle. Project Planning: Types of Project Plans and feasibility.

### Unit-II:

Project Network logic: Project Networking and work flows, Activity duration and methods of estimating activity duration – One time estimate three time estimates, Duration estimation procedure. Use of Bar Charts, Mile stone charts and networks, Network representation schemes: Activity on Arrow and Activity on Node Networks (A-o-A & A-o-N), Logic behind developing project network and simple network calculations, Critical paths and floats.

### Unit-III:

### Decision making through networks: CPM, PERT & PDM:

Use of network in Decision Making: Importance of critical path, Monitoring the progress and updating the project plan. Use of floats in Resource smoothening, Introduction to Precedence Diagramming Method (PDM), Different lag and lead relations in terms of SS(Start to Start), SF(Start to Finish), Finish to Start(FS), and Finish to Finish(FF) and composite relations.

### Unit-IV:

Project Cost Control: Breakeven analysis in planning stage, Direct and indirect cost, slope of direct cost curve, Total project cost and optimum duration, contracting the network for cost optimization. Escalation & Variation in prices.

### Unit-V:

### Projects Financing:

Introduction to project financing; Role of governments in financing projects. Funder and Concessionaire: Economic multiplier effects of Projects: Means of financing-public finance and private finance. Granting authority: World Bank Group, IMF, ADB, Micro and Small Enterprises Funding Scheme (MSME), Elementary understanding of Procurement of infrastructure projects through Public Private Partnership (PPP) route. Build Operate Transfer (BOT). Build Operate Own & Transfer (BOOT): Stakeholders' perspectives. Lifecycle of PPP projects, Micro & Macro economics concepts and its application in Project Financing.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes

Upon completion of the course, the students will be able to:

- CO 1: Know the attributes of project and its different phases.
- CO 2: Develop the project network based on work breakdown structure and esimation of activity durations
- CO 3: Analyze the project network and make decide the various alternates.
- CO 4: Evaluate the optimum cost of project for assigned deadlines.
- CO 5: Understand the different options to arrange the finances to complete it within stipulated time

### Recommended Text-Books:

- 1. Project Management Scheduling PERT and CPM by Dr. B.C. Punmia, K.K. Khandelawal
- 2. PERT & CPM Principles and Applications by L.S. Srinath, Affiliated EWP Pvt. Ltd.
- 3. Project Planning and Control by Albert Lester, Fourth Edition Elsevier Butterworth-Heinemann.

### Recommended Reference Books:

- 1.A Management Guide to PERT/CPM With GERT/PDM/DCPM and Other networks by Jerome D. Wiest, Ferdinand K. Levy, Prentice Hall.
- Project Management with CPM and PERT by Joseph J. Moder, Cecil R. Phillips, Van Nostrand Reinhold Company

### ANNEXURE – IX

### Suggestive List of Skill Based Mini Projects for B.Tech IIIrd Semester

### 2110321, Fluid Mechanics - I:

- 1. Determination of Metacentric height of different shapes
- 2. Comparison of velocity measurement by orifice & pitot tube
- 3. Verification of Bernoulli's theorem for pipe flow & tank
- 4. Verification of Stoke's law for different liquid
- 5. Determination of Reynold's Number for different fluid.

### 2110323, Geotechnical Engineering:

- 1. Use of locally available waste materials as a soil stabilizer.
- 2. Improvement of swelling properties of black cotton soil using agricultural waste.
- Effectiveness of modern reinforcing materials such as coir fibers, jute fibers, rubber tyre chips etc. in California Bearing Ratio based Flexible pavement design.
- Study the Stress-strain behavior of soil mixed with poly propylene fibers using direct shear test.
- Examine the variation in A-line curve of stabilized cohesive soil along with all the Atterberg's limits.
- Identify the Swelling pressure of Black cotton soil and observed its usefulness as a foundation material of any single-storey building.

### 2110324, Transportation Engineering:

- 6. Identification of black spots.
- 7. Safety audit & rectification of black spots.
- 8. Use of local materials in rigid pavement
- 9. Effect of long term ageing on the performance of bituminous mix.
- 10. Identification of pavement distress and its remediation.
- 11. Traffic census of urban roads.
- 12. Analysing the effect of salinity of water on compressive strength of cement concrete.
- Analyzing the effect of particle size of aggregates in compressive strength or pervious paver block.
- 14. Analyzing the effect of sugar as retarder on properties of OPC
- Potential utilization of recycled aggregate waste on mechanical properties of cement concrete.

### DEPARTMENT OF CIVIL ENGINEERING

### SYLLABUS B.Tech Civil Engineering

2023 ADMITTED BATCH

SEMESTER-I

Civil Engineering Department, MITS Gwalion

(A Gost. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Code: 3110122

Course Name: Building Materials & Construction

L T P Credit 3 0 2 4

### Course Objectives:

- To study the properties of concrete ingredients. i.e. cement. Sand and coarse aggregate by conducting different tests.
- To select of different types of admixtures to improve the properties of concrete for different field applications.
- 3. To conduct the field and laboratory tests on concrete in fresh and hardened state.
- 4. To provide knowledge about various types of bricks, stones, woods & timber, ferrous & nonferrous construction material & their applications.
- To provide knowledge on design of foundation, including selection of appropriate foundation.
- 6 To understand laying & construction of brick & stone masonry and various methods of damp proofing etc.
- 7. To provide knowledge about stairs, floors & roofs in various types of buildings.

### Syllabus:

### Unit-I

Types of Foundation& its design: masonry construction, masonry classification, stone v/s brick masonry, joints in stone masonry, brick masonry (bonds in brick masonry, characteristics of bonds, type of bonds), typical structures in brickwork, Damp prevention (causes, effects, control & prevention techniques, material used for damp proofing), Anti termite treatment, water proofing treatment, Arches & lintels, stair & stair case, (types & design of stair case), Types of floor & flooring, Roof & roof covering.

### Unit - II

Ingredients of Concrete: Portland cement Chemical composition of cement, Hydration of cement, setting of cement, tests on physical properties of cement. Types of Portland cement — Ordinary Portland cement — Rapid Hardening Portland cement — low heat Portland cement—Sulphate Resisting cement — Portland Blast furnace cement—Super Sulphated cement—Portland Pozzolana cement and Pozzolanas: Fly ash; use of pozzolanas, white cement, Expansive cements — High alumina cement.

<u>Aggregates</u>: General classification of aggregates, natural and artificial aggregates, particle shape and texture, strength of aggregate, Mechanical properties of aggregate, specific gravity, Bulk density, porosity and absorption of aggregate, moisture content of aggregate, Bulking of sand deleterious substances in aggregates. Soundness of aggregates, Alkali- aggregate reaction, Fineness modulus, Grading requirements.

Admixtures: Introduction, functions of admixtures, classification of admixtures, Accelerators, Retarders, Water Reducing Agents, Super plasticizers, air entraining admixtures.

Civil Engineering Department, MITS Gwalior

\_\_\_\_\_ 66 | Pag

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Unit-III

Fresh and Hardened Concrete: Fresh Concrete, Workability of concrete, factors affecting workability, measurement of workability using slump test, Compaction factor test, Flow test, Vec-Bee Test, Ball penetration test, Segregation and Bleeding of concrete, process of concrete manufacturing.

<u>Hardened Concrete</u>: Compressive & Flexural strength of concrete, drying shrinkage of concrete, Creep of concrete, Permeability and durability of concrete, Thermal properties of concrete.

### Unit IV

Bricks (classification, characteristics, manufacturing, testing, and types). Stones (classification, Quarrying, seasoning characteristics, testing, selection & uses, preservation), Wood & Timber (Classification, Structure & characteristics, seasoning and its methods, defects & diseases, preservation & various treatment testing), wood products and their applications

### Unit V

Mortar (Classification, characteristics, functions of ingredients). Types of mortar and their uses grout, guniting, ferrous material (Pig iron, CI, Mild steel, wrought iron, stainless steel, compositions & proposition). Reinforced steel bars (classification, types, designation), Aluminium (its alloys & uses). Copper (its alloys & uses), Ceramics (classification, properties, commercial forms), Paint varnishes & enamels (types, composition, method of application, defects)

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Explain the basic elements of buildings, engg. materia's & construction.

CO2: Evaluate the properties of various materials like cement, aggregate, concrete, admixture, brick, stone etc.

CO3: Distinguish the suitability of building materials in the construction of elements of buildings.

CO4: Evaluate various types of concrete in building construction accordingly.

CO5: Apply various techniques for finishing & protection works of various elements of building.

### Text Books:

- 1. Concrete Technology, M. L. Gambhir, Tata McGraw Hill education Pvt. Ltd., 5th edition 2013
- Concrete Technology, M.S. Shetty, S. Chand Publications, 2006
- 3. Building Materials, M.L. Gambhir, Tata McGraw Hill education Pvt. Ltd., 2017
- 4. Building Construction, B.C. Punmia, A.K. Jain, Laxmi Publishers New Delhi, 2016

### Reference Books:

- Properties of Concrete, Neville. ELBS, Pearson Education, 5th edition 2012
- Building Material, S.K. Duggal, New Age Publishers, 4th revised edition 2012

### List of Experiments:

- 1. Determination of properties of cement.
- 2. Determination of properties of sand.
- Determination of properties of aggregate.
   Determination of Fineness of cement.
- 5. Determination of consistency of cement.
- Determination of workability of concrete by slump test.

Civil Engineering Department, MITS Gwalior

8 Jul

67 | Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

- Determination of workability of concrete by compacting factor apparatus.
- 8. Determination of workability by Vee Bee consistometer.
- 9. Determination of water absorption of bricks.
- 10. Determination of efflorescence of brick.
- 11. Field testing on bricks.
- 12. Determination of crushing strength of bricks.

Upon completion of practical course, the students will be able to:

- CO 1: Determine the properties of cement, sand & aggregate as per IS code.
- CO 2: Determine the workability of concrete for suitability of concrete mix in different construction works.
- CO 3: Evaluate compressive strength of various concrete mixes.
- CO 4: Determine physical properties of brick by experiment and practice accordingly.
- CO 5: Examine the properties of the cement mortar for various elements of the buildings.

### Suggestive List of Skill Based Mini Project:

- 1. Mix Design (M20 & M25)
- 2. Fresh & Hardened Concrete Design.
- 3. Development of Innovative Building Materials like brick etc using waste materials.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopni MP)

### Course Code: 3110123 Course Name: Engineering Mechanics

L T P Credit
3 0 0 3

### COURSE OBJECTIVES:

1. To learn about basic laws of Mechanics and its application for different types of force systems.

2. To learn the Laws of friction and its applications

3. To study the applications of equilibrium concepts in Engineering problems.

4. To study about properties of areas like Centroid and Moment of Inertia.

5. To learn the basics of kinematics and Kinetics of particles and its applications in free vibration.

### SYLLABUS

### Unit-I

Forces and Equilibrium: Graphical and Analytical Treatment of Concurrent and non-concurrent coplanar forces, free body Diagram, Force Diagram and Bow's notations, Introduction to force system in space; Equilibrium Concepts.

### Unit-II

Equilibrium Problem involving Frictional forces, Friction: Laws of Coulomb friction, inclined plane; ladder friction; wedge friction, square threaded screws; belt friction; rolling resistance

### Unit-III

Support Reactions, Analysis of plane Trusses, method of joints, method of Sections, Graphical method. Shear force and bending moment diagram for cantilever, simply supported and overhanging beam with concentrated, distributed load and Couple.

### Unit-IV

Properties of areas: Centroid of plane areas, Moments of inertia, theorem of parallel axis and theorem of perpendicular axis; product of inertia of areas, polar moment of inertia, principal axes and principal moments of inertia.

### Unit-V

Kinematics and Kinetics of particles: Particle dynamics; Free Vibrations of undamped Single Degree of Freedom system

### COURSE OUTCOMES

On successful completion of teaching-learning and evaluation activities, a student would be able to

- 1. Apply basic laws of Mechanics for different types of force systems.
- 2. Apply the Laws of friction in engineering problems.
- 3. Apply the concept of equilibrium in statically determinate beams and trusses.
- 4. Determine the properties of areas for different shapes.
- 5. Apply the basics of Kinematics and Kinetics of particles in motion and undamped free vibration.

### Text book:

- 1. R. C. Hibbeler, Engineering Mechanics (Statics and Dynamics), Pearson Education Asia Pvt. Ltd
- 2. RS Khurmi and N Khurmi, A Textbook of Engineering Mechanics, S. Chand and Co. Ltd.
- 3. R. K. Rajput, Engineering Mechanics, Dhanpat Rai Publications (P) Limited
- 4. J. L. Meriam and L.G. Kraige, Engineering Mechanics (Static & Dynamics), John Wiley

### Reference books

1. F. P. Beer and E. R. Johnston, Mechanics for Engineers (Static & Dynamics), McGraw Hill

2. (S. P. Timoshenko, D. H. Young, and J. V. Rao, Engineering Mechanics, Tata-McGraw Hill,

### Course Objectives:

(3)

12

13

0

(3)

0

3

- To create awareness about various sources of energy and their applications.
- To create awareness about various environmental issues and how to deal with those environmental issues.
- To impart fundamental concepts in environmental engineering dealing with air, water and waste management.
- To create awareness about sustainability concepts and need of sustainable development for development of society.
- 5. To create awareness about various environmental policies.

### Syllabus:

- Unit 1: Energy: Various forms of Renewable and non-renewable energy and their applications, Solar Energy, Hydro, wind, biomass, geothermal, tidal and nuclear energy, green energy, clean energy, role of energy in economic and social development.
- Unit 2: Water Environment: Ecosystems & its components, Water Cycle, Water availability & uses, Water resources problems and its solutions, Water pollution problems, Water quality characteristics & standards, Introduction to water treatment mechanisms.
- Unit 3: Air Environment: Air pollution, causes, global effects, climate change and its impact, Introduction to air pollution control measures, Carbon credit, Carbon trading, Clean Development Mechanism (CDM).
- Unit 4: Waste Management: Introduction to management of municipal solid waste, E-waste and plastic waste, various initiatives in management of waste.
- Unit 5: Sustainability: Introduction to the concept of sustainability & sustainable development, Sustainable development goals, TBM, Challenges for sustainable development.

Policies: Multilateral environmental agreements and Protocols - Kyoto Protocol, Montreal Protocol, Indian policies - Environment Protection Act 1986, Waste Management rules 2000.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1. Explain the fundamental concepts of energy, ecosystems & environment.
- CO 2. Recognize various environmental problems and their effects.
- CO 3. Apply various air & water remediation methods.
- CO 4. Apply waste management techniques.
- CO 5. Apply the concepts of sustainability

### Text Books:

 D. K. Asthana, Meera Asthana, A Text Book of Environmental Studies, S Chand & Co., New Delhi.

P. Meenakshi, Elements of Environmental Science & Engineering, PHI, New Delhi

Civil Engineering Department MITS Gwalior

70 | 9 a g e

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

3. M.M. Sulphey, M.M. Safeer, Introduction to Environment Management, PHI, New Delhi

4 S.K. Dhameja, Environmental Engineering & Management, S.K. Kataria & Sons, new Delhi

### Lab Work:

Basic Analysis of Water Quality Parameters: pH, Acidity, Alkalinity, Solids.

### Skill Based Mini Project:

Students have to deliver a presentation in class preferably on power point and submit a write up of the same on following topics (preferably group project wherein students divided into group of 4):

- Identification of potential water related problems in the vicinity of their residence and propose solutions for these problems.
- 2. Identification of potential air pollution issues in the vicinity of their residence and propose solutions for these problems.
- 3. Identify waste related issues in the vicinity of their residence and propose solutions for these issues.
- 4. Study of Solar Energy Panel in the Institute.
- 5. Study of Wind Mill in the Institute.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Code: 3100020 Course Name: Basic Civil Engineering & Mechanics

L T P Credit 3 0 0 3

### Course Objectives:

- 1. To understand the utility of various types of building materials.
- 2. To understand the location, construction detail and suitability of various building elements.
- 3. To determine the location of object on ground surface.
- 4. To stabilize the position of various object.
- 5. To understand the effects of system of forces on rigid body in static conditions.
- 6. Analysis of determinate structure (beam & truss)

### Syllabus:

### Unit- I

<u>Building Materials</u>: Stones, bricks, cement, timber - types, properties, test & uses, Introduction of concrete properties & Laboratory tests on concrete, curing of concrete and mortar Materials.

### Unit- II

<u>Surveying & Positioning</u>: Introduction to surveying, Survey stations, Measurement of distancesconventional and EDM methods, Measurement of directions by different methods, Measurement of elevations by different methods, reciprocal leveling.

### Unit- III

Mapping & Sensing: Mapping details and contouring, Plane tables and related devices. Introduction of theodolite. Measurement of areas and volumes, application of measurements in quantity computations, Introduction of remote sensing and its applications.

### Unit- IV

Forces and Equilibrium: Graphical and Analytical Treatment of Concurrent and non-concurrent coplanner forces, free body Diagram, Force Diagram and Bow's notations, Application of Equilibrium Concepts: Analysis of plane Trusses, method of joints, method of Sections. Frictional force in equilibrium problems.

### Unit -V

Centre of Gravity and moment of Inertia: Centroid and Centre of Gravity, Moment of Inertia of Composite section, Radius of Gyration, Introduction to product of Inertia and Principle Axes.

Support Reactions, Shear force and bending moment diagram for cantilever & simply supported beam with concentrated, distributed load and Couple.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Explain concepts and terminologies of building materials, surveying and mechanics.

CO 2: Apply various methods for surveying and mechanics.

CO 3: Determine the location, area and volume of objects on ground surface.

Civil Engineering Department MITS Gwalior

72 | Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

CO4: Solve the problems of surveying and mechanics by using various methods.

CO5: Analyse the effects of system of forces on rigid bodies in static conditions.

### Text Books:

- Surveying, Vol. I. Punmia B.C., Laxmi Publications, 17th edition, 2016
- 2. Building Material, B. C. Punmia, Laxmi Publications, 2016
- 3. A textbook of Engineering Mechanics, D. S. Kumar, Katsons Publications, 2013

### Reference Books:

- 1. Basic Civil Engineering, S. Ramamrutam & R. Narayan, Dhanpat Rai Pub., 3rd edition, 2013
- 2. Applied Mechanics, Prasad I.B., Khanna Publication 17th edition, 1996
- 3. Surveying, Duggal, Tata McGraw Hill New Delhi, 4th edition, 2013
- 4. Engineering Mechanics Statics & Dynamics, R.C. Hibbler, Pearson Publications, 14th edition, 2015
- 5. Engineering Mechanics statics dynamics, A. Boresi & Schmidt, Cengage learning, 1st edition,
- Applied Mechanics, R.K. Rajput, Laxmi Publications, 3rd edition, 2016

### ANNEXURE - XII

### PO ATTAINMENT FOR 2018-2022 BATCH

## OVERALL PO ATTAINMENT CALCULATION (2018-2022) along with Action taken

| Action Taken  | Extra practice problems are to be given for courses like Strength of Materials, Fluid Mechanics. Surveying, Structual Analysis and solutions are discussed in the tutorial class.  Revision sessions are to be conducted of Engineering Mechanics prerequisite for the subject Strength of Materials.  Assignments based on Bernoulli's equation, Fluid Flow problems. Tacheometry, Theodolite traversing, Stress-Strain Analysis, Torsion etc. are to be given at second year level. | Students are encouraged to observe their surroundings to gain insight into real life engineering problems and think of possible solutions for these problems.  2. Field/Technical visits are carried out so that student can gain knowledge on complex engineering problems and their solutions.  3. Incorporating more numerical problems and conducting tutorials during regular lectures in courses like Surveying, Structural Analysis, Fluid Mechanics etc. |

| New experiments are designed based on latest trends.     Lectures by industry experts are arranged to understand the current trends in industry.     Currectulum is updated based on latest trends. | The assignments and tutorials are designed in such a way that students are able to practice the use of standard codes.     A wide awareness of use of codes like IS, IRC, NBC, CPHEEO to the students are given.     Students utilize the guidelines of IS codes, IRC, NBC, CPHEEO during B. Tech projects. | In the curriculum, multi decision criteria methods and determination of uncertainty are to be added.     Students utilize the knowledge acquired during Internship in industry to critically analyse a problem and subsequently plan for solutions.     Students are given insight in the critical issues which involve decision making through expert lectures from industry persons. |

## B. FACULTY FEEDBACK ANALYSIS ON COURSE CONTENT - May 2023

### Faculty Feedback

- 1. The availability of books & E-fearning material in the institute is good.
- » 2. The Courses and content are up to date.
- 3. The course curriculum/syllabi are helpful in meeting the higher studies/placement requirements according to present global trends.
  - 4. The course / contents in your domain/area are well designed and frequently updated, hence need no changes at present.
    - 5. The curriculum is capable of inculcating life-long learning abilities in students.
- 1. The availability of books & E-learning material in the institute is good.
- # 2. The Courses and content are up to date,
- 3. The course curriculum/syllabi are helpful in meeting the higher studies/placement requirements according to present global trends.
  - 4. The course / contents in your domain/area are well designed and frequently updated, hence need no changes at present.
    - The curriculum is capable of inculcating life-long learning abilities in students.

##Elective-I

S30114. Industrial Waste Management

530115. Environmental Auditing & Management System

530116. Environmental Hydraulics

"Open Category Course (OC-1) will have to be opted from the pool of open courses (Student can opt from parent department and other department)

800110. Sustainable Waste Management System.

During tobs, students have to perform practical/assignments/minor projects related to theory subjects/theoretical concepts of respective semester using recent technologies/ languages / tools etc.

Selflearning / presentition through SWAVAM / NRTEL. (Registration in a course will be compulsory for students bus assessment will be based on internal seminar

2023 ADMITTED BATCH

**SEMESTER-I** 

As mo

Civil Engineering Department, MITS Gwalion

9 × 109|1

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Code: 510121

### Course Name: Construction Materials, Machines & Techniques

| L | T | P   | С |
|---|---|-----|---|
| 3 | 2 | 114 | 3 |

### Course Objectives:

- 1. To impart knowledge about ingredients of concrete, production of concrete at site and ready mix concrete.
- 2. To apprise about special concretes for different field requirements.
- To apprise about various types of equipments/machineries used in construction industry.
- 4. To develop understanding of construction procedure for piles and well foundations.
- 5. To impart know-how of formwork and scaffolding.
- 6. To develop technical know-how of shop and insitu construction/fabrication.

### Syllabus:

### Unit-I

Concrete and its ingredients: Ingredients of concrete including mineral admixtures and chemical admixtures: Proportioning of ingredients; Stages in production of concrete i.e. Batching, Mixing, Transporting, Placing compacting and curing, Design of high strength concrete; Production of Ready mix concrete.

### Unit-II

Special Concrete: Polymer concrete, Light weight concrete, Heavy weight concrete, Concrete for radiation shielding, No-Fines concrete, Pervious concrete; Ferro cement; Fiber reinforced concrete, Dry lean concrete and Pavement quality concrete; Self compacting concrete.

### Unit-III

Construction Equipments: Characteristics, Operation and selection of different types of construction equipments viz. Power shovels, Drag lines, Scrapper, Bulldozer, Tractor, Rippers, Motor graders; Equipments for aggregate processing plant; Ready Mix Concrete Plant; and Hot Mix plant

### Unit-IV

Construction of piles, Well foundations, Cofferdams and diaphragms; Drilling and Foundations: blasting, Underpinning, Shoring and shuttering,

Formwork: Different types of formworks, Stationary and slip formwork techniques, Formwork of special structures eg. Shells, Bridges, Towers etc. Scaffolding

### Unit-V

Steel Construction: Shop and insitu construction techniques, Pre-engineered buildings; Erection of steel structures like bridges, and trusses.

Application of prefabrication in construction, Modular coordination and Prefabrication: standardization; equipments for industrial production of prefabricated components.

Prestressing: Prestressing methods; Materials; Loss of prestress: equipments for industrial production of prestressed components; Production of Railway Sleepers, Poles and Tanks.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO 1: Define the relevant characteristics of concrete and its ingredients,

CO 2: Explain the details of various stages in concrete production.

CO 3: Design congrete mix for specific requirements using codal provisions.

Civil Engineering Departments MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

- CO 4: Determine the suitability of special concretes for specific requirements.
- CO 5: Evaluate the suitability of various equipments for a construction site.
- CO 6: Apply shop and insitu methods and the pre-stressing concepts for a construction project.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 510113

Course Name: Contract Management

| L | T | P | C |
|---|---|---|---|
| 3 | - |   | 3 |

### Course Objectives:

- 1. To understand specification writing, rate analysis and estimating.
- To understand necessity and methods of valuation.
- 3. To understand role of Architect, Engineer, Contractor and Owner in a construction project.
- 4. To know about different acts related to construction.
- 5. To know about various laws related to construction labour.
- 6. To know about important conditions of contract in construction.
- 7. To understand the construction contracts used in infrastructure projects.

### Syllabus:

### Unit-I

Quantity Surveying: Basic principles of estimating. Construction costs. Different methods and stages of estimating. Specification of construction items and method of statement. Principles of rate analysis and valuation.

### Unit-II

Claims and Arbitration: Indian contract act and arbitration act. Variations in work and conditions.

Claims and disputes. Liquidated damages. Rights. Responsibilities and duties of client (Owner).

Architect. Engineer. Contractor etc. Purchase order as contracts insurance contract and claims.

### Unit-III

Legal Frame Work of Construction: Contract labors act 1970 and other acts and laws relating to labors management. Wages, Bonus and Industrial disputes.

### Unit-IV

Contract Conditions: Important contract clauses. Terms of payments. Retention. Acceptance and final payment. Time of completion. Extension of time, Maintenance period etc.

### Unit-V

Construction Contracts: BOT projects, Variation in BOT projects, Infrastructural projects, International contract rules and regulation.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Write the specifications and perform rate analysis of various construction items.

CO2: Prepare estimate of building/road works and valuation.

Civil Engineering Department MITS Gwalion

M21Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

CO3: Differentiate between rights and responsibilities of Architect, Engineer, Contractor and Owner in a construction project,

CO4: Apply the provisions of various acts and laws applicable in construction.

CO5: Draft tender document for construction project.

CO6: Identify the role of project participants and financing of infrastructure projects.

- 4. Construction Contracts by Jimmie Hinze, Publisher Tata McGraw-Hill Education
- 5. Estimating and Costing by B.N. Datta

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 510114

Course Name: Maintenance Management

| L | T | P | C |
|---|---|---|---|
| 3 |   | - | 3 |

### Course Objectives:

- 1. To learn about building services required in a building.
- 2. To learn about fire fighting systems in buildings.
- 3. To understand planning and maintenance requirements of lifts in high rise buildings.
- 4. To understand water management and planning system in a building.
- 5. To learn maintenance of building services and management of related tasks.

### Syllabus:

### Unit I

Introduction: Introduction to primary services in a building. Type of services required to keep facility usable, planning of services. Organization structures of services management. Role and administrative functions of supervisors. Outline of the concept of carbon trading and self sustainable zero carbon building. Importance

### Unit II

Fire Fighting: Standard fire, fire resistance, classification of buildings. Basic requirement of the works for fighting system, various components of the fire fighting system. Maintenance required of the system, fire fighting in high-rise buildings, commercial/industrial complexes. Public buildings, checklist for fire safety. Provision of NBC,

### Unit III

Lifts/Elevators, Escalators: Legal formalities for elevators, various types of lifts, working mechanisms of lift and escalators. Indian standard codes for planning & installations of elevator, inspection & maintenance of lifts.

### Unit IV

Plumbing Services Water Supply System: Basics of Plumbing systems. Requirement of Plumbing works, Agency, Activity flow chart for plumbing work. Quality checking of materials. Water supply and distribution system is high-rise building & other complexes, pumps and pumping mechanisms. Operation & maintenance of fittings & fixtures of water supply & sanitary. Do's & Don'ts for water pipe networks.

Civil Engineering Department, MITS Gwallor

(A Gowt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Unit V

Maintenance and management of services: Telecommunication network, computer network LAN, Electrical network & appliances. Basics of single phase & three phase electrification, precautions and safety measures during electrification, Indian standard codes for electrical appliances & wiring operations & maintenance of network & appliances. Landscaping & Horticulture. Building maintenance management, applications of computer in service management. Flowcharts of air conditioning & heating. Centralised systems, monitoring and working of the equipments, Checklist of inspection, Performance testing. Water proofing. Damp proofing & Termite proofing. Working procedure & stages of work of water proofing for W.C., Bathrooms, Terrace, sloping roof, Basements, tanks. Use of chemicals for water proofingtreatment.

### Course Outcome:

Upon completion of the course, the students will be able to:

CO1: Identify various services required in a building,

CO2: Carry out planning of fire fighting system for a building.

CO3: Develop a management strategy for maintenance of building services in a building.

CO4: Design a sustainable building services plan for a building.

### Reference Books:

 Building services Design and Management by Jakie Partman, Willey Blackwell 2014.

2. Building Services Engineering by David V. Chadderton, Routledge 2013.

Course Code: 510115

Course Name: Infrastructure Development

| L | T | P | C |
|---|---|---|---|
| 3 |   |   | 3 |

### Course Objectives:

- To make them understand the various aspects like operation, maintenance, sustainability, life cycle cost of infrastructure systems.
- 2 To make them able to develop infrastructure system plan considering various risks.
- 3. To make them develop disaster management plan for Infrastructure systems.
- 4. To illustrate use of l. T. Tools for various phases of Infrastructure system.

### Syllabus:

### Unit-1

Infrastructure and economic development: Energy needs, sources and management. Different types of build infrastructure systems, challenges and opportunities.

### Unit -II

Strategic issues in Infrastructure development: Planning, Design and Construction of Infrastructure. Quality control in Infrastructure development. Role of Public PPP in Infrastructure development.

### Unit-III

Performance monitoring: Maintenance, Rehabilitation and Renovation of Infrastructure. Life cycle cost analysis of Infrastructure.

### Unit-IV

Risk management in Infrastructure projects: Basic components of risk, components of risk management - risk assessment, risk acceptance, treatment, monitoring and communication.

### Unit - V

Disaster management of Infrastructure: Application of IT tools in various phases of Infrastructure development.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO 1: Develop plan for infrastructure considering operation, maintenance, sustainability and life cycle cost.

CO2: Identify various risks in Infrastructure projects.

Civil Engineering Department, MITS Gwalior

X116|Page

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

CO3: Illustrate management and disaster management needs for Infrastructure systems.

CO4: Apply 1. T. Tools in various phases of Infrastructure system.

### Reference Books:

- 1. Infrastructure Development and Financing in India by N Mani Publisher Rediff books, 2012

Course Code: 510116

Course Name: Formwork for Concrete Structures

| L | T | P | C |
|---|---|---|---|
| 3 |   |   | 3 |

### Course Objectives:

- 1. To know about various formworks for concrete structure.
- 2. To know about various issues in formworks and subsequent solutions.

### Syllabus:

### Unit-1 Introduction

Introduction to Sheeting, Shuttering, Centering, Staging, Formwork, Scaffolding and False work, Mould. Formwork as a temporary structure. Requirements for a formwork. Classification (Types) of Formwork. Formwork Materials.

### Unit-2 Formwork for building components

Formwork for raft foundation, pile foundation, footings, RCC columns, beams, slabs and wall. Formwork area calculation. Various loads and moments on formwork. Slip form and their types.

### Unit-3 Formwork for special structure

Formwork for Highways. Formwork for Bridge structures. Formwork for Multi-Story Building Construction. Formwork for precast concrete. Formwork for pre-stressed concrete. Flying formwork and their advantages, disadvantages and limitations.

### Unit-4 MIVAN Formwork

Introduction, materials used in MIVAN formwork, parts of MIVAN formwork, Procedure of MIVAN formwork construction, pin and wedge system in MIVAN formwork. Work cycle of MIVAN formwork, Comparison between MIVAN and traditional formwork, Technical specification of MIVAN formwork, advantages and disadvantages of MIVAN formwork

### Unit-5 Issues and failure of Formwork

Causes of Formwork Failure. Common deficiency in design leading to formwork failure. A case study on formwork failure. Avoiding formwork failure. Pre-Award and Post -award Formwork Management Issues.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Explain the concept of formworks.

CO2: Explain various types of formworks.

CO3: Evaluate the use of formworks in various structures.

Civil Engineering Department, MITS Gwalior

9 ×

(A Govt, Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

CO4: Assess the failure issues in formworks.

### Reference Books:

### Course Code: 800108

### Course Name: Organizational Behaviour & Management

| L | T | P | C |
|---|---|---|---|
| 3 | - |   | 3 |

### Course Objectives:

- 1. To know the environment levels in management.
- To explore the organizational structure and its design.
- 3. To understand the stress management and communication.
- 4. To explore the leadership quality for updating the organisation structure.
- 5. To compare and explore the existing management activity in the world.

### Syllabus:

### Unit - I:

Nature of Management: Social Responsibilities of Business - Manager and Environment Levels in Management - Managerial Skills - Planning - Steps in Planning Process - Scope and Limitations - Short Range and Long Range Planning - Flexibility in Planning - Characteristics of a sound Plan - Management by Objectives (MBO) - Policies and Strategies.

Unit-II

Organisation: Organisation Structure and Design - Authority and Responsibility Relationships - Delegation of Authority and Decentralisation - Interdepartmental Coordination - Emerging Trends in Corporate Structure, Strategy and Culture - Impact of Technology on Organisational design - Mechanistic vs Adoptive Structures - Formal and Informal Organisation.

### Unit - III

Perception and Learning - Personality and Individual Differences - Motivation and Job Performance - Values, Attitudes and Beliefs - Stress Management - Communication Types-Process -Barriers - Making Communication Effective.

### Unit - IV

Group Dynamics: Leadership - Styles - Approaches - Power and Politics - Organisational Structure - Organisational Climate and Culture - Organisational Change and Development.

### Unit - V

Comparative Management Styles and approaches: Japanese Management Practices
Organisational Creativity and Innovation - Management of Innovation - Entrepreneurial
Management - Benchmarking - Best Management Practices across the world - Select cases of
Domestic & International Corporations - Management of Diversity.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

After completing this course, the students will be able to:

- CO1: Explain the environment levels in management.
- CO2: Analyse the organizational structure and its design.
- CO3: Apply the stress management and communication in organization.
- CO4: Develop the leadership quality for updating the organisation structure.
- CO5: Evaluate the existing management activity in the world.

### Recommended Books:

- 1. Kast & R. Seuwing : Organisation & Management
- 2. Singh & T. N. Chabra: Management Concepts & Practices
- 3. George R. Terry : Principles of Management
- 4. Anthony : Art of Japanese Management
- 5. Aswathapa K : Organisational Behaviour

Alson The Rolling 2 lax

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 800109

Course Name: Safety & Quality Management

| L | T | P | C |
|---|---|---|---|
| 3 |   | - | 3 |

### Course Objectives:

- 1. To study the basics of quality and safety management,
- 2. To learn the code of practice in design and construction for quality standards.
- To understand and evaluate quality and safety management principles and best practices in construction.
- 4. To understand and evaluate safety management principles in construction;
- To acquire good basic practices for quality system and progress for quality assurance and quality improvement for construction companies.

### Syllabus:

### Unit - I

Quality Management: Introduction - Definitions and objectives, Factors influencing construction quality; Responsibilities and authority; Quality plan; Quality Management Guidelines: Quality circles; cost of quality and safety; Quality transition - quality control and inspection; quality assurance: total quality management-principles, tools and techniques; Planning and control of quality during design of structures; Tools and techniques for quality management.

### Unit - II

Quality Systems: Introduction - Quality system standard, ISO 9000 family of standards; Requirements-Preparing Quality System Documents; Quality related training; Implementing a Quality system; Third party Certification; Quality assurance in construction; Concepts of quality control- Objectives, definitions, and systems.

### Unit - III

Quality Planning: Quality Policy, Objectives and methods in Construction industry; Consumers satisfaction, Ergonomics, Time of Completion, Statistical tolerance, Taguchi'sconcept of quality; Inspection procedures-Processes and products (materials and machinery); Total cost implication.

### Quality Assurance and Quality Improvement Techniques:

Objectives of quality assurance; Methods, Techniques and needs of quality assurance; Different aspects of quality Appraisals; Critical, major failure aspects and failure mode analysis; Stability methods and tools; Reliability testing, Reliability coefficient and reliability prediction; Life cycle costing; Value engineering and value analysis; Quality Improvement Tools and Techniques.

Safety management; Planning for safety provisions, budgeting for safety, safety policy. Safety audit, safety management practices, safety survey, safety inspection, safety sampling, evaluation of performance of supervisors on safety; Construction hazards and safety guidelines; Overall accident investigation process; Risk management; Prevention techniques for construction accidents; Site management with regard to safety recommendations; Training for safety awareness and implementation; Construction safety and health manual.

### Unit-V

Recent trends and Case studies: Quality and safety issues in steel construction, concrete construction (including pre-cast, and pre-stressed); computer aided hazard analysis.

### Course Outcomes:

After this course, students will be able to:

- CO 1: Explain the quality management systems and utilize the ISO 9000 family of standards.
- CO 2: Improve the quality of the project through tools and techniques.
- CO 3: Perform the environmental impact assessment (EIA) for construction projects towards quality.
- CO 4: Analyse the quality assurance and quality control quality improvement tools and techniques:
- CO 5: Evaluate the contract and inspection procedures.
- CO 6: Identify the safety management practices in construction industry.

### Reference Books:

- 1. B. G. Dale, Managing quality,4th ed., Blackwell Publishing, Oxford, 2003.

Course Code: 510119

Course Name: Construction Lab

| L | T | P | C |
|---|---|---|---|
| - |   | 4 | 2 |

### Course Objectives:

- To Study and understanding basic knowledge of building materials, such as their identification and classification, relationships between physical characteristics and mechanical properties experimentally measuring them.
- 2 To understand the role of water in soil and concrete behavior.
- To understand the concrete mix design and testing; non-destructive testing methods; Studies on simple building system components

### List of Experiments:

- 1. Mix Design of Concrete
- 2. Permeability Test of Concrete
- 3. Creep Test of Concrete
- Measurement of In-situ Strength determination by Rebound Hammer and Moisture content in aggregates, soil and hardened concrete surface using NDT techniques.
- 5. Unconfined Compression Test
- 6. Direct Shear Test
- 7. Static Cone Penetration Test
- Triaxia1 Shear Test
   (Unconsolidated Undrained, Consolidated Undrained, Consolidated Drained)
- 9. Vane Shear Test
- 10. C.B.R Test of Soil
- 11. Consolidation Test
- 12. SPT Test (Demonstration)
- 13. Marshall stability test of bitumen

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Check physical properties of soil, aggregate, and concrete.

CO2: Check strength properties of soil, aggregate, and concrete.

CO3: Differentiate the flow properties and stresses of soil.

CO4: Apply various non-destructive testing method on concrete.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopsl MP)

Course Code: 510120

Course Name: Self Learning / Presentation

L T P Credit

### Course Objectives:

- To encourage students to read, study & understand different topics of CTM published in articles, literatures.
- To help in presenting different topics of CTM and related subjects to supplement theoretical knowledge gained in class.
- 3) To make student acquire good oral & written communication skills.
- 4) To promote the habit of lifelong learning.
- To prepare students develop adequate soft skills to be able to present their topic effectively to listeners.

### Syllabus:

Any relevant topic related to civil engineering/CTM from within or beyond the syllabus through Swayam / NPTEL/MOOC.

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Analyze contemporary issues in civil engineering/CTM & its allied areas through literature survey.
- CO 2: Distinguish state of art & relevance of the topic in national & international arena.
- CO 3: Demonstrate good oral & written communication skills.
- CO 4: Develop poster and power point presentations for effective communication.
- CO 5: Display lifelong learning.

### DEPARTMENT OF CIVIL ENGINEERING

SYLLABUS M.Tech Env Engg

2023 ADMITTED BATCH

**SEMESTER-I** 

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 530111

Course Name: Environmental Chemistry & Microbiology

L T P Credit 3 0 0 3

### Course Objectives:

- 1) To impart knowledge of environmental chemistry and its concepts.
- 2) To apply concepts of environmental chemistry in various analysis of water and waste water.
- 3) To impart knowledge of environmental microbiology and its concepts.
- 4) To apply concepts of environmental microbiology in various analysis of water and waste water.

### Syllabus:

### Unit 1:

### Environmental Chemistry

Basic Principles: Physical and chemical properties of water and their significance in environmental engineering. Types of chemical reactions — stoichiometric calculations — solutions — chemical equilibrium. Acid-base equilibria — alkalinity, acidity, buffers and buffer index — Chemical thermodynamics — Oxidation-Reduction — Mass transfer and transport of impurities in water and air — diffusion, dispersion — Physical and chemical interactions due to various forces, suspensions and dispersions.

### Unit II:

Analysis: Basic concepts of quantitative analytical chemistry – Instrumental methods of analysis – Determination of turbidity, colour, pH, acidity, alkalinity, hardness, residual chlorine and chlorine demand, chlorides, dissolves oxygen demand, nitrogen, solids, iron and manganese, fluoride, sulphate, phosphorous and phosphate, grease, volatile acids, gas analysis – Preparation of standard solutions – Drinking water and wastewater standards – Trace organics and inorganics.

### Unit III:

### Environmental Microbiology

Introduction: Microorganisms — Classification, prokaryotic and eukaryotic cells, structure, characteristics, nucleic acids, DNA and RNA, Viruses, their detection and quantification — Microscopy — Measurements and isolation of Microorganism — Différent Cultures — Media and Techniques of Staining and Enumeration of microorganism.

### Unit IV:

Microbial metabolism and growth: Enzyme and enzyme kinetics - Metabolism - Respiration - Fermentation - Glycolysis - Kreb's cycle - Carbohydrate - Protein, lipids, significance of energetic - Chemical composition of cell and nature of organic matter used by microorganisms - Metabolic classification of microorganisms: phototroph, chemotroph, applications in environmental engineering.

### Unit V:

Microbiology of water and wastewater: Distribution of microorganisms in natural water - Indicator organisms - Coliforms - Faecal coliforms - E.coli, streptococcus faecals - Differentiation of coliforms - Significance - MPN - M.F. techniques - Microbiology of waste-water treatment processes such as activated sludge process - Trickling filter - Anaerobic processes.

Civil Engineering Department, MITS Chalipr

artment, Mil Topanor

128 Page

(A Gost. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain the concepts of environmental chemistry & microbiology.
- CO 2: Apply the concepts of environmental chemistry in environmental engineering.
- CO 3: Analyse water and waste water quality parameters using the concepts of environmental chemistry.
- CO 4: Apply the concepts of environmental microbiology in environmental engineering.
- CO 5: Explain the concepts of energy generation in cells.

### **Books Recommended:**

- Maier R.M. Pepper I.L and Gerba C.P. Environmental Microbiology, Elsevier- AP, New York 2009.
- Pekzar Jr, M.J., Chan E.C.S., Krieg R.N., and Peiczar M.F., Microbiology, Tata McGraw-Hill, New Delhi, 1996.
- Sawyer C.N., McCarty P. L., and Parkin G.F., Chemistry for Environmental Engineers, McGraw-Hill, New Delhi, 1994.
- Benefield, Judkins and Weand Process Chemistry for Water and Wastewater Treatment, Prentice Hall, New Delhi, 1996.
- Rittman B. McCarty P.L., and McCarty P., Environmental Biotechnology: Principles and Applications, McGraw-Hill, New Delhi, 2000

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 530112

### Course Name: Solid and Hazardous Waste Management

L T P Credit 3 0 0 3

### Course Objectives:

- To provide broad knowledge on various aspects of planning & implementation of waste management system in a smart city/town.
- 2) To understand the principles applied in waste management.
- 3) To understand various ways to collect, treat & disposal of waste.
- 4) To understand various methods of energy recovery from waste.
- To understand various aspects of hazardous waste management, E-waste management, biomedical waste management etc.

### Syllabus:

### Unit I:

Introduction: Introduction to waste management, classification of solid waste, objective of solid waste management, Solid waste sources - Nature and characteristics (physical, chemical & biological) - Quantities and Qualities - Generation rates - Potential of disease - Nuisance and other problems.

### Unit II:

Collection and Storage: Solid waste management – Functional elements of solid waste – on – site storage – Collection and separation – Containers and its location – Collection systems and its example – Vehicle routing – Route balance – Transfer station – Processing – Recovery and reuse.

### Unit III:

Processing of Municipal Solid Waste: Conveying and compacting waste – Shredding – Types of shredders – Material separation – Types – Devices for material separation – Thermal processing of municipal solid waste – incineration, pyrolysis, gasification – Refuse Derived fuel – Biological process like composting, Vermicomposting and biomethanation.

### Unit IV:

Disposal: Disposal methods - Sanitary land filling - Planning - Site selection - Design - Landfill Process - Monitoring Closure - Post closure monitoring - leachate management & control of gases in landfills, environmental monitoring of landfills, MSW rules, Introduction to swachh bharat mission and smart cities program - current status, challenges and future trend of waste management.

### Unit V:

Hazardous Waste Management: Introduction to hazardous waste - Definition - Characterization and composition - TCLP test - Storage and transportation of hazardous waste - Labeling of hazardous waste - Physical, Chemical and Biological treatment of hazardous waste - Bioremediation of hazardous waste - Treatment of Bio medical - Nuclear waste and Radio - Active waste - Fly ash management and E-waste management.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO 1: Explain the principles & concepts of waste management.

Civil Engineering Department MITS Gwalior

2 GoiPag

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

- CO 2: Apply various techniques of handling the waste.
- CO 3: Apply various techniques of energy recovery from waste.
- CO 4: Plan an effective & efficient waste management system.

### Text Books:

- Text Book of Solid Wastes Management, Iqbal H. Khan and Naved Ahsan, CBS Publishers, 1st edition 2012
- Integrated Solid Waste Management, Hilary Theisen and Samuel A, Vigil, George Tchobanoglous, McGraw Hill Yew York, 1993

### Reference Books:

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 530113

### Course Name: Advanced Treatment Process – I (Waste Water Engineering)

L T P Credit

### Course Objectives:

- To impart basic knowledge on sewerage system including estimation of sewage quantity & design of sewers.
- 2) To provide a broad knowledge on sewage composition & its characteristics.
- To provide information on disposal standards of effluents & also about various methods of sewage disposal.
- To provide broad knowledge on various techniques of sewage treatment including advanced processes.

### Syllabus:

### Unit I:

Estimation of sewage flow, fluctuations in flow, estimation of storm water quantity, self cleansing velocity, systems of sewerage, design of sanitary sewer & storm water sewer, sewer materials, sewer appurtenances, construction & maintenance of sewer lines, sewage characteristics.

### Unit II:

Conventional municipal waste water treatment flow sheet, functions of different unit process, unit operations, treatment requirements. Preliminary treatment: screening, grit removal, design of screen, grit chamber. Primary Treatment: principles of sedimentation, design of sedimentation tanks and skimming tanks. Biological Treatment: principles & objectives of biological treatment, types of biological treatment, fundamentals of process kinetics, kinetics of biological growth, reactors — classification, selection, aspects of reactor design.

### Unit III:

Attached & suspended growth biological treatment system, design of activated sludge process, trickling filters, oxidation ponds, septic tanks, imhoff tanks, rotating biological contactors, aerated lagoon, oxidation ditch, anaerobic treatment – UASB process, anaerobic filters, anaerobic digester, anaerobic lagoons.

### Unit IV:

Advanced waste water treatment: requirement of tertiary treatment, disinfection, nitrogen removal, phosphorus removal, adsorption, removal of dissolved inorganic substances using various filtration techniques like R.O., ultra filtration etc., electrodialysis. Recent techniques of waste water treatment – MBBR, MBR, SBR, constructed wetlands.

### Unit V:

Sludge treatment: sources of sludge, sludge quantity & quality, sludge thickening and digestion, various methods of sludge treatment, sludge drying beds, sludge disposal.

Sewage disposal: stream & effluent standards for various purposes, dilution methods, natural purification of stream, oxygen sag curve & its analysis, disposal of sewage on land, methods of sewage farming.

Civil Engineering Department, MNS Gwalion

132 | R dige

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Explain the concepts of waste water engineering & treatment.
- CO 2: Determine the requirements of safe disposal of sewage.
- CO 3: Apply various techniques for treatment of sewage.
- CO 4: Apply various techniques of sludge treatment and disposal.
- CO 5: Design sewage system for safe disposal of sewage.

### Text Books:

- Sewage Disposal & Air Pollution Engineering, S. K. Garg, Khanna Publishers, 2016
- 2 Metcalf & Eddy, Inc. Wastewater Engineering, Treatment and Reuse, 3rd Edition, Tata McGraw-Hill, New Delhi, 2003.

### Reference Books:

- I. Waste Water Engineering, B.C. Punnia, Laxmi Publication.
- 2 Water & Waste Water Technology, Mark J Hammer, Prentice Hall of India, New Delhi
- 3. Wastewater Treatment Plant, Planning Design & Operation, S.R. Qasim, CRC Press, 1998
- 4. CPHEEO, Manual on Sewerage and Sewage Treatment, Ministry of Urban Development, Central Public Health and Environmental Engineering organization, Government of India, New Delhi, 2013.

MK was de to

Civil Engineering Department, MITS Gwalior

(A Gost. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 530114

Course Name: Industrial Waste Management

| L | T | P | Credit |
|---|---|---|--------|
| 3 | 0 | 0 | 3      |

Course Objectives:

- 1) To provide broad knowledge on various methods of sewage disposal, their effects on water pollution & also provide information on various disposal standards.
- 2) To learn the basics of sewage composition & its characteristics.
- To provide knowledge on various waste water treatment techniques.
- To provide broad knowledge on common effluent treatment plants, wastewater reuse, waste audit.
- 5) To provide information about various existing waste treatment & management techniques of various industries.

### Syllabus:

### Unit-I:

Effects of wastes on streams and sewage treatment plant, natural purification of streams, oxygen sag curve, allowable organic load on streams, classification of stream, stream standards and effluent standards requirement of water for different purposes.

### Unit-II:

Sampling of waste waters. Grab, Composite and Integrated samples, analysis of waste water, Biochemical Oxygen Demand, Chemical Oxygen Demand and pH value of waste water. Toxicity of waste by Bioassay method.

Pre-treatment of Wastes: Volume and strength reduction, source reduction of wastes, salvage of materials, recovery of by products, reuse of waste water.

### Unit-III:

Equalization, Neutralization, Removal of suspended solids, removal of inorganic and organic dissolved solids, sludge treatment & disposal, Advance methods of treatment such as Adsorption, Reverse Osmosis, Ion Exchange Process, Electro Dialysis, etc.

### Unit-IV:

Industrial Waste water and environmental impacts, Industrial waste survey, Industrial and common effluent treatment plants, zero effluent discharge systems. Waste management approach, Waste Audit -Evaluation of pollution prevention options.

### Unit-V:

Brief study of industrial processes and treatment methods of waste water from common industries such as Textile, Dairy, Paper and pulp, Tannery, Distillery, petrochemicals, pharmaceuticals, fertilizers, cement & food processing.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Explain basic concepts of industrial waste management.

CO2: Evaluate the effects of industrial waste on streams as per the standards.

CO3: Determine the requirements for safe disposal of sewage.

CO4: Apply suitable techniques for reduction & treatment of industrial waste & sludge.

CO5: Explain waste management techniques of different industries.

### Text Books:

- Industrial Waste Water Treatment A.D. Patwardhan, PHI, Delhi
- 2. Waste Water Engg. Treatment Disposal & Reuse Metcalf & Eddy Tata Mc Graw Hill, New Delhi

- 1) To provide broad knowledge on various aspects of environmental management system.
- 2) To understand the principles of environmental auditing and complete process.
- 3) To apply the concepts of LCA in environmental management.
- 4) To understand the EMS approach and ISO.
- 5) To understand various concepts of social accountability.

### Syllabus:

Unit I: Concepts of Environmental Audit, objectives of audit, types of audit, features of effective auditing, audit criteria, elements of audit process, planning and organizing audits, pre-visit data collection, audit protocol, onsite audit, data sampling, inspection, evaluation and presentation, exit interview, audit report, action plan, management of audits, waste management contractor audits, environmental statement.

Unit II: Environmental audit in Industrial projects, case studies of environmental audits. Life cycle assessment approach (LCA), life cycle costing, eco labeling, stages in LCA of product, procedures for LCA, applications of LCA, sustainable approach towards environment management, green building & green energy concepts and management.

Unit III: Environmental Management Systems Approach (EMS): Introduction, principles & elements of successful environmental management, basic concepts of EMS approach, ISO principles, essential elements of an EMS & ISO 14001, benefits of an environmental management system, creating an EMS in line with ISO 14000.

Unit IV: Environmental Management Planning, EMS development and implementation project and plan, measurement and evaluations required for an EMS, environmental management reviews and improvements, legal and regulatory concerns, Integrating ISO 9000 & ISO 14000, EMAS.

Unit V: Social Accountability: requirements, social accountability (SA) 8000 certification, elements of social management system, social policy, planning, implementation, business benefits, corporate social responsibility (CSR), different models.

### Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Illustrate the process of environmental auditing,

CO2: Demonstrate the environmental audit process in industry and other projects.

CO3: Explain the concepts of environmental management system approach through ISO guidelines.

CO4: Apply various environment management methodologies like LCA, social accountability.

CO5: Develop EMS in organizations and improve the existing EMS system.

AK wheel I was in the go will

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

Course Code: 530116

Course Name: Environmental Hydraulics

L T P Credit 3 0 0 3

# Course Objectives:

- 1) To understand the concepts of fluid mechanics and apply them in pipe flow calculations.
- 2) To understand the principles of open channel flow and apply them in sewer system design.
- 3) To apply concepts of hydrology in estimation of storm water and its design.
- 4) To understand concepts of ground water hydraulics.
- 5) To understand concepts of pollutant transfer and estimation of pollution load in water bodies.

# Syllabus:

# Unit I:

Introduction to concepts of fluid flow - continuity equation, energy principle, momentum principle, frictional head loss, flow through pipes, major and minor energy losses in pipes, hydraulic gradient and total energy line, flow through pipe in series, parallel, equivalent pipe, water hammer pressure, design of water distribution pipe network using hardy cross method and equivalent pipe method.

### Unit II:

Open channel flow and its classifications, critical flow computations, sub-critical flow, super-critical flow, uniform flow, gradually varied flow, most efficient/economical sections in channel, specific energy, hydraulic jump, hydraulic elements of sewer & design of sewers.

#### Unit III:

Introduction to Hydrology, Hydrological cycle, Precipitation measurement and analysis of data, runoff and its estimation, hydrograph – unit hydrograph, s-curve hydrograph, synthetic hydrograph, rational method, estimation of storm water quantity and design of storm water sewers.

#### Unit IV:

Ground water estimation & well hydraulics — confined & unconfined aquifers, governing equations for yield of well (Thiem's & Dupuit's), well loss & specific capacity, ground water recharge. Transport & transformation of contaminants in groundwater: processes, governing equations, and initial and boundary conditions, solution of simple cases,

Pumps and their classification, pump performance curves, selection of pumps, head, power & efficiency of pumps, economical diameter of rising main, pumping station and their designs.

#### Unit V:

Introduction to Pollutant transport process in surface water, standards for pollutant disposal in surface water, factors affecting pollutant transport and mixing in river — dilution, dispersion, oxidation, reduction etc., zone of pollution in river, mixing mechanism in river, sag curve, streeter phelps equation. Introduction to various software's for design of pipe networks & sewer lines.

#### Course Outcomes:

Upon completion of the course, the students will be able to:

CO 1: Apply fluid mechanics principles in analysis and design of pipe flow.

Civil Engineering Department, MIT Squalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

- CO 2: Apply principles of hydraulics for design of sewer lines.
- CO 3: Apply principles of surface water hydrology for design of storm water sewer.
- CO 4: Estimate groundwater quantity and pollution load on groundwater and surface water.
- CO 5: Apply the principles of hydraulies in design of pumping stations and estimation of pollution load on rivers.

## Text Books:

# Course Code: 800110

# Course Name: Sustainable Waste Management System

L T P Credit
3 0 0 3

# Course Objectives:

- 1) To develop an understanding about the concepts of sustainability & sustainable development.
- To understand the concepts of water conservation techniques.
- 3) To understand the concepts of wetlands & other natural wastewater treatment system.
- To provide knowledge on various low cost sanitation methods & other sustainable waste management techniques.
- To provide an insight into sustainable design of buildings.

# Syllabus:

## Unit I:

Introduction: Concept of sustainability in water and waste management, sustainable development, guidelines and strategies for implementing sustainable development. Pollution prevention & Cleaner production in achieving sustainability, Environmental indices - Bio remediation.

## Unit II:

Water Conservation: Rainwater Harvesting - Roof water harvesting - Technology - Quality - Health issues - Groundwater recharge - Techniques - Case studies - Wastewater reuse and reclamation.

#### Unit III:

Natural Wastewater Treatment Systems: Centralized Vs decentralized – Natural and constructed wetlands – Different types – Mechanisms – Performance – Design – Case studies – Land treatment systems.

#### Unit IV:

Low-Cost Sanitation: Dry sanitation methods - Pit latrines - VIP latrines - Aquaprivy - Septic tank.

Organic Solid Waste Management Techniques: Composting/ Vermicomposting - Biogas technology - Plasma technology

# Unit V:

Green Design: Green buildings - benefits and challenges; public policies and market-driven initiatives; Effective green specifications; Energy efficient design: Passive solar design: Green power; Green materials and Leadership in Energy and Environmental Design (LEED)

## Course Outcomes:

Upon completion of the course, the students will be able to:

CO1: Illustrate the concepts of sustainability & sustainable development.

CO2: Apply various methodologies of water conservation in field.

CO3: Apply various natural methodologies of wastewater treatment like wetlands

CO4: Apply various low cost sanitation & other waste management techniques.

Civil Engineering Department, MITS Gwalior

(A Gost, Aided UGC Autonomous & NAAC Accredited Institute Affiliated to R.G.P.V., Bhopal MP)

CO5: Plan for sustainable and green design of buildings.

Course Name: Environmental Engineering Lab

L T P Credit 0 0 4 4

# Course Objectives:

- 1) To acquire knowledge of various types of sampling, its procedure including its preservation.
- 2) To acquire skills to determine various physical, chemical & biological characteristics of water.

## Syllabus:

Introduction to Sampling Procedure, Types of Sampling, Collection of Samples & Preservation of Sample.

## List of Experiments:

- Determination of physical characteristics of water sample (pH, Turbidity, Total Solids (Suspended & Dissolved Solids), Electrical Conductivity)
- 2. Determination of Acidity & Total Alkalinity of water sample.
- 3. Determination of Total Hardness, Calcium Hardness, Magnesium Hardness of water sample.
- 4. Determination of Chloride of water sample.
- 5. Determination of Sulphate of water sample.
- 6. Determination of Available Chlorine in bleaching powder & Residual Chlorine of water sample.
- Determination of Nitrate & Phosphate of water sample.
- 8. Determination of Optimum Dosage of Coagulants using Jar Test.
- 9. Determination of MPN of water sample.
- 10. Application of Plate Count Method for bacterial growth.
- 11. Study on Gram Staining Technique.

#### Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Follow sampling procedure & other guidelines for sampling & analysis of water samples.
- CO 2: Check various water quality parameters.
- CO 3: Improve the water quality by suggesting suitable corrective measures.
- CO 4: Train others on various ways of improving the quality of water.

# Course Objectives:

- To encourage students to read, study & understand different topics of Environmental Engineering published in articles, literatures.
- To help in presenting different topics of Environmental Engineering and related subjects to supplement theoretical knowledge gained in class.
- 3) To make student acquire good oral & written communication skills.
- 4) To promote the habit of lifelong learning,
- 5) To prepare students develop adequate soft skills to be able to present their topic effectively to listeners.

# Syllabus:

Any relevant topic related to Environmental Engineering from within or beyond the syllabus through Swayam / NPTEL/MOOC.

## Course Outcomes:

Upon completion of the course, the students will be able to:

- CO 1: Analyze contemporary issues in Environmental Engineering & its allied areas through literature survey.
- CO 2: Distinguish state of art & relevance of the topic in national & international arena.
- CO 3: Demonstrate good oral & written communication skills.
- CO 4: Develop poster and power point presentations for effective communication.
- CO 5: Display lifelong learning.

Elective 1:- Concrete Technology

Elective UI:- Construction Materials Technology

Dr. Sahjay Tiwari

Research Supervisor

Professor & Head Dr. M. K. Trivedi

Civil Engineering Department, MITS Gwallor

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

# Elective I - Concrete Technology

#### COURSE DESCRIPTION

Concrete is one of the most vital materials used in construction. Concrete is made up of cement, coarse aggregate; fine aggregate, water and admixtures. The strength of concrete is directly depends upon the properties of these materials and their proportion in the concrete. In this course students will learn the various properties of concrete ingredients and various properties of concrete itself and their testing including non-destructive testing such as ultrasonic pulse velocity test, rebound hammer test etc. They will also learn the various mix design methods to design the concrete for different construction works.

#### COURSE OBJECTIVES

- 1. To understand the properties of ingredients of concrete.
- 2. To study the behavior of concrete at its fresh and hardened state.
- 3. To study about the concrete design mix.
- 4. To know about the procedures in concrete at different stage.
- To understand special concrete and their uses.

#### COURSE OUTCOMES

On completion of this course, the students will be able to

- To identify suitable materials to be used in the cement concrete by conducting various tests as per BIS code.
- 2. Test all the concrete materials as per BIS code.
- 3. Design the concrete mix using ACI and BIS code methods.
- 4. Determine the properties of fresh and hardened of concrete.
- 5. Design special concretes and their specific applications and use of admixtures.
- Ensure quality control while testing/ sampling and acceptance criteria for pre and post construction work.
- 7. Use of non-destructive testing equipment.

#### COURSE CONTENT

#### Section A

#### Unit I: Introduction

Concrete materials. Cement: Field and laboratory tests on cement, Types of cement and their uses, different tests for aggregates. Methods for manufacturing of cement. Wet and dry process. Hydration of cement, Bogue's compound.

Civil Engineering Department, MITS Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

#### Unit II: Admixtures

Accelerating admixtures, Retarding admixtures, water reducing admixtures, Air entraining admixtures, colouring agent, Plasticizers, Batching, Mixing, Transportation, Placing of concrete, curing of Concrete

#### Section B

## Unit III: Behaviour of Concrete

Strength of concrete, Shrinkage and temperature effects, creep of concrete, permeability of concrete, durability of concrete, Corrosion, Causes and effects, remedial measures. Thermal properties of concrete, Micro cracking of concrete.

#### Section C

# Unit IV: Mix Design

Factors influencing mix proportion, Mix design by AC1 method and I.S. code method, Design of high strength concrete.

## Section D

# Unit V: Special Concrete

Light-weight concrete. Fibre reinforced concrete, Polymer modified concrete, Ferro cement.

Mass concrete, Ready-mix concrete, Self-compacting concrete, Quality control, Sampling and testing, Acceptance criteria.

# Elective III - Construction Materials Technology

Unit-I: Basic Building Materials I Aggregate: Classification, Physical and mechanical properties, soundness, alkali-aggregate reaction, thermal properties of aggregate Bricks and Masonry Blocks: Types, properties and field and laboratory tests to evaluate quality Lime: classification, properties Cement: types, Portland cement: chemical composition of raw material, bogue compounds, hydration of cement, role of water in hydration, testing of cements, fly ash: properties and use in manufacturing of bricks and cement.

Unit-II Mortar: Types and tests on mortars. Concrete: Production, mix proportions and grades of concrete, fresh, mechanical and durability properties of concrete, factors affecting properties of concrete, tests on concrete, admixtures, Special concrete: light weight concrete, high density concrete, vacuum concrete, shotcrete, steel fiber reinforced concrete, polymer concrete, Ferro cement, high performance concrete, self-compacting concrete.

Unit-III Basic Building Materials II Building stone: classifications, properties and structural requirements; Wood and Wood products: Introduction to wood macrostructure, sap wood and heart wood, defects and decay of timber, seasoning and preservation of timber, fire resisting treatment, introduction to wood products- veneers, plywoods, fibre board, particle board, block board, batten boards, Metals: Steel: Important properties and uses of Iron (Cast iron, wroght iron and steel), Important tests on steel rebar, aluminum and copper. Glass: types and uses, gypsum: source, properties, uses; plastic: properties and uses, paint: types, distemper, varnish, Adhesive: Types, Bitumen: types, properties and tests.

Unit-IV Basic Building Constructions Foundation; purpose, types of foundation- shallow, deep, pile, raft, grillage foundation. Masonry: Brick Masonry: types of bonds, relative merits and demerits of English, Single Flemish and Double Flemish bond. Stone Masonry: General principles, classification of stone masonry and their relative merits and demerits, Cavity wall: components and construction, Arches: Terminology and classifications Doors and Windows: Types, materials used Module-V Finishing, Services and Special constructions Wall Finishes: Plastering, pointing, distempering and painting: Purpose, methods, defects and their solutions. Vertical communication: Stairs: Terminology, requirements of good staircase, classification; ramps, lifts and escalators. Damp proofing: causes, effects, prevention and treatments. Fire resistant construction: Fire resistant properties of common building materials, requirements for various building components.
