Report about the Meeting (Online) with B.Tech Civil VI Sem Students

An online meeting was conducted on 11.01.2024 at 5 PM as per the instructions given by DEAN (Academics) Ref. No. DA/MP/2024/121 dated 10.01.2024. In this meeting students were motivated to take part in various teaching learning activities by Dr. M. K. Trivedi (Professor & HOD). Dr. Sanjay Tiwari and Dr. Hemant Shrivastava explained the students about the various teaching learning activities and its importance. They also explain how the students can contribute in teaching learning activities and contribute in overall learning along with their faculty members. Various teaching learning activities which were explained and discussed by Dr. Hemant Shrivastava are peer-learning, brainstorming session, concept mapping, one minute paper, real time reactions, chain notes, idea line up, mystery quotation and sketch noting. Many more activities will be discussed in upcoming meetings. Students were also informed that how these activities will enhance their career and how it will help their faculty members as well as the institute. In second part of the meeting, students were also informed the importance the activity based learning and learning by doing/performing. "Learning by doing" is a pedagogical method based on the idea that you can learn something better and faster if you practice it – if you "do it", as the name suggests. When trying to put it into practice, though, you might realize that it is not quite as obvious as it seems. This will help the students to clear the concepts better and apply the concepts in real life problems.

Following are the suggestions by the students:

Discuss more examples in class

No suggestion

Lecture with presentation

Solve more numerical problems in class

In lab experiment should be conducted by students
