PROCEEDING/DELIBERATIONS
OF
BOARD OF STUDIES (BoS)
IN
COMPUTER SCIENCE & ENGINEERING
AND
INFORMATION TECHNOLOGY
(BoS Meeting Dated -6th October,2018)

MINUTES OF THE MEETING OF BOS IN COMPUTER SCIENCE & ENGINEERING AND INFORMATION TECHNOLOGY

Date: 06/10/2018

Meeting of the Board of Studies in Computer Science & Engineering and Information Technology was held on 06/ 10 / 2018 in the department of CSE & IT, 02:00 PM Onwards. During the meeting following were present.

1.	Dr. Akhilesh Tiwari	Chairman
2.	Dr. R. K. Gupta	Member
3.	Dr. Manish Dixit	Member
4.	Ms. Khushboo Agarwal	Member
5.	Mr. Punit Kumar Johari	Member
6.	Dr. Sanjiv Sharma	Member
7.	Mr. Vikas Sejwar	Member
8.	Mr. Abhilash Sonkar	Member
9.	Ms. Jaimala Jha	Member
10.	Mr. Jamvant Singh Kumare	Member
11.	Mr. Rajeev Kumar Singh	Member
12.	Ms. Neha Bhardwaj	Member
13.	Mr. Mahesh Parmar	Member
14.	Mr. R. R. Singh Makwana	Member
15.	Mr. Amit Kumar Manjhvar	Member

In addition to above, faculty members engaged under TEQIP-III Project and contractual faculty were also present.

The following external members could not attend the meeting. However, some of them have given their suggestions in electronic mode.

1.	Dr. Goutam Sanyal, Professor, NIT Durgapur	External Member (Academics)
2.	Dr. Anand Shrivastava, Professor, IIIT Delhi	External Member (Academics)
3.	Mr. Amitabh Shrivastava, Senior Consultant, TCS Noida	External Member (Industry)
4.	Mr. Paritosh Jain, Director (Engineering), IHS Markit, Gurgaon.	External Member (Alumnus)
5.	Dr. (Mrs.) Vinda Tokekar, Professor, IET-DAVV, Indore	External Member (Academics)

As per the agenda of BoS meeting, following were discussed and recommended:

ITEM CSEIT-1:	<p>To frame the COs for all core courses from V Semester to VIII Semester to be offered under the <u>Flexible Curriculum</u> based on the present needs of stakeholders and society</p> <p>Course Outcomes (COs) for all the Departmental Core (DC) courses (related to V - VIII Semester, B.Tech CSE & IT), to be offered under Flexible Curriculum were discussed, finalized and recommended. The same is enclosed as Annexure-I.</p>
----------------------	--

(Handwritten signatures and notes)

Mr. R. K. Gupta
 Dr. Manish Dixit
 Ms. Khushboo Agarwal
 Mr. Punit Kumar Johari
 Dr. Sanjiv Sharma
 Mr. Vikas Sejwar
 Mr. Abhilash Sonkar
 Ms. Jaimala Jha
 Mr. Jamvant Singh Kumare
 Mr. Rajeev Kumar Singh
 Ms. Neha Bhardwaj
 Mr. Mahesh Parmar
 Mr. R. R. Singh Makwana
 Mr. Amit Kumar Manjhvar

External Members:
 Dr. Goutam Sanyal
 Dr. Anand Shrivastava
 Mr. Amitabh Shrivastava
 Mr. Paritosh Jain
 Dr. (Mrs.) Vinda Tokekar

Page 1/1
 06-10-18

	Academic Year 2018-19, nature of courses (in terms of complexity level) and previous attainment level of respective course have been considered. The same is enclosed as Annexure-VII.						
ITEM CSEIT-8:	To propose "Equivalence of Subjects" for all courses running in the various schemes Equivalence of courses have been discussed, analyzed & recommended. The same is enclosed as Annexure-VIII.						
ITEM CSEIT-9:	To review and submit complete syllabi and scheme separately for the three schemes which are running presently Scheme and syllabi related to batches 2014-18, 2015-19 & 2016-20 and 2017-21 & 2018-22 (up to IV Semester only) has been discussed, reviewed and compiled for submission. The same is enclosed as Annexure- IX.						
ITEM CSEIT-10:	Other matters: VALUE ADDED COURSES (VAC) During the meeting, Value Added Courses (VAC) designed by the department have been considered for review and discussion. Detail of these courses is as follows and contents are enclosed as Annexure- X. <table border="1" data-bbox="588 1086 1235 1243"> <thead> <tr> <th>S.No.</th> <th>Course Name</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Android Based App Development</td> </tr> <tr> <td>2</td> <td>Programming with Python</td> </tr> </tbody> </table> INDUSTRY INTERFACE / MoUs/ COLLABORATIONS In order to strengthen the interface with industrial houses and organizations of national importance, it is discussed to make efforts for more collaboration, which will be beneficial for joint project / dissertation guidance at UG/ PG level, student internship & faculty training. During the discussion, progress of student projects which are running under the MoU and collaboration with Madhya Pradesh Police Reforms has been discussed.	S.No.	Course Name	1	Android Based App Development	2	Programming with Python
S.No.	Course Name						
1	Android Based App Development						
2	Programming with Python

Dean Academics

Course Outcomes
of
Departmental Core (DC) Courses
B.Tech V Semester
(Computer Science & Engineering)
Under Flexible Curriculum

SOFTWARE ENGINEERING
150502 (DC-9)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Explain the various fundamental concepts of software engineering.
 - CO2:** Develop the concepts related to software design & analysis.
 - CO3:** Compare the techniques for software project management & estimation.
 - CO4:** Choose the appropriate models for real life software project.
 - CO5:** Design the software using modern tools and technologies.
 - CO6:** Test the software through different approaches.
-

WA

THEORY OF COMPUTATION

150503 (DC-10)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Explain the basic concepts of switching and finite automata theory & languages.
 - CO2:** Relate practical problems to languages, automata, computability and complexity.
 - CO3:** Construct abstract models of computing and check their power to recognize the languages.
 - CO4:** Analyse the grammar, its types, simplification and normal form.
 - CO5:** Interpret formal mathematical methods to prove properties of languages, grammars and automata.
 - CO6:** Develop an overview of applicability of automata theory, languages and computation to solve engineering problems.
-

WA

MICROPROCESSOR & INTERFACING

150504(DC-11)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Compare the architecture and features of different 16-bit microprocessor interfacing chips & microcontrollers.
 - CO2:** Develop programming skills in assembly language of 8086 microprocessor and 8051 microcontroller.
 - CO3:** Illustrate the concept of interfacing with peripheral devices.
 - CO4:** Make use of different interrupts and addressing modes.
 - CO5:** Design an interfacing mechanism for I/O devices.
 - CO6:** Build a system based on 8086 microprocessor and 8051 microcontroller.
-

WA

Course Outcomes
of
Departmental Core (DC) Courses
B.Tech VI Semester
(Computer Science & Engineering)
Under Flexible Curriculum

COMPILER DESIGN
150601 (DC-12)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Recall the concepts of finite automata and context free grammar.
 - CO2:** Build the concept of working of compiler.
 - CO3:** Examine various parsing techniques and their comparison.
 - CO4:** Compare various code generation and code optimization techniques.
 - CO5:** Analyze different tools and techniques for designing a compiler.
 - CO6:** Design various phases of compiler.
-

W+

COMPUTER NETWORKS

150602 (DC-13)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Explain the fundamental concepts of computer network.
 - CO2:** Illustrate the basic taxonomy & terminologies of computer network protocols.
 - CO3:** Develop a concept for understanding advanced computer networks.
 - CO4:** Build the skill of IP addressing and routing mechanism.
 - CO5:** Predict the performance of computer network in various situations.
 - CO6:** Construct the network environment for implementation of computer networking concept.
-

W.L.

Course Outcomes
of
Departmental Core (DC) Lab Courses
B.Tech V Semester
(Computer Science & Engineering)
Under Flexible Curriculum

SOFTWARE ENGINEERING (Lab)

150502 (DC-9)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1: Demonstrate the basic concept of UML.
 - CO2: Discuss the software development process using different tools.
 - CO3: Display the various ways for solving different common modelling problems using UML.
 - CO4: Use the knowledge of Software engineering and project management.
 - CO5: Identify the vocabulary, rules and idioms of the UML and learn how to model it effectively.
 - CO6: Design the software systems using software engineering concepts.
-

W4

THEORY OF COMPUTATION (Lab)
150503 (DC-10)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Judge various computational models.
 - CO2:** Construct abstract models of computing.
 - CO3:** Justify the power of abstract models in computing to recognize the languages.
 - CO4:** Demonstrate analytical thinking and intuition for problem solving in the related areas.
 - CO5:** Discuss the limitations of computation in problem solving.
 - CO6:** Follow set of rules for syntax verification.
-

124

MICROPROCESSOR & INTERFACING (Lab)

150504(DC-11)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1:** Differentiate the various types of instructions and addressing modes.
 - CO2:** Identify the Hex code/ Machine code of instructions in assembly language.
 - CO3:** Perform interfacing of various peripheral devices and memory with microprocessor.
 - CO4:** Demonstrate the arithmetic & Logical operation using instruction set of 8086/8051 microprocessor.
 - CO5:** Use of 8086/8051 for interfacing with I/O devices.
 - CO6:** Build the assembly language programs in 8086/8051 to solve real world problems.
-

Department of Computer Science & Engineering and Information Technology

COMPILER DESIGN (Lab)
150601 (DC-12)

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1: Discuss the knowledge of patterns, tokens & regular expressions in programming for problem solving.
 - CO2: Design and Implement various parsing techniques.
 - CO3: Operate different types of compiler tools.
 - CO4: Develop programs for implementing code optimization techniques.
 - CO5: Build symbol table and intermediate codes.
 - CO6: Demonstrate the functionalities of different phases of the compilation process.

*Gaps in CO Attainment Levels
for
Academic Year 2017-18
and
Proposed Corrective Measures for Improvement*

Approved by

Principal

Gaps in CO attainment:

1. Inappropriate CO mapping with questions in question papers.
2. Sample (of students) is different in direct and indirect methods for CO attainment.
3. Random sample (of students) may result in the degradation of CO attainment level.
4. More appropriate method is required for calculating direct CO attainment of Lab courses.
5. CO feedback from students using MOODLE- for indirect CO attainment is not sufficient.

Proposed Corrective measures:

1. Course Outcomes (COs) should be based on generalized aspects of the course contents.
2. Sample of students must be same for direct and indirect methods of CO attainment.
3. Efforts should be made to improve the performance of weaker students, which in turn may improve the attainment level.
4. Other methods (such as Peer Learning/ Group Tasks / Report Writing etc.) for indirect assessment should also be included.

Contents
for
Value Added Courses (VAC)

List and Content of Value Added Courses Offered by the Department

1.	Programming with Python	Introduction, Relationship between computers and programs, Python setup and first program of python, Basic principles of computers, Python interpreter, Control Structures: loops and decision, Iterations, Expressions, list, Dictionaries, Operators (unary, arithmetic, etc.) Data types, variables, Assignment statements, Strings and string operations, Built-in Functions, Designing and Debugging, Modules, Classes, And Objects, Numpy Module, Networkx Module.
2.	Android Based App Development	Installing Java, Java Program Development, Conditional and looping constructs, Introduction of Arrays, Class Fundamentals, Object & Object reference , Access Control, Modifiers, Method Overloading, Abstract Class & Interfaces Defining Methods, Types of Inheritance in Java, Organizing Classes and Interfaces in Packages, Introduction to Android: Types and History, Creating Android Project Hello World App, Installing Android SDK and Android studio, Android applications structure, Android Manifest, Resources, Views, Debugging, Android Activities, Activity Life Cycle, Android Layouts, Fragments Adapters, Intents and Broadcast Receivers Intents, Services, Intent Service.

VA
