REPORT

These are the steps that we took forward to increase the participation of the students:-

- We started with offline sessions with the students in which we inform more about the MOU, the benefits of competitive programming.
- Then we created a telegram group with the registered students.
- Session 1 - First meet was scheduled for all the registered students in which we guided them about the codechef platform, practice problems, assignments, and cleared their doubts.
- We also shared the links of the video solution of the practice problems.
- Session 2 – In this meet we discussed about assignment problems of week 8 and week 9.
