Course outcomes

Lab CO	After attending the lab in Engineering Chemistry (100101) the student will be able to:
CO1	Develop experimental skills required for the application of chemistry in engineering.
CO2	Operate different chemicals and instruments specified in the course safely and efficiently.
CO3	Analyze water samples, lubricants, fuel, alloys, and ores for different properties
CO4	Function as a member of a problem-solving team

Skill-Based Mini Project

Guidelines for delivering the Project:

Students will have to deliver a 10 Minute presentation preferably on PowerPoint.

1. The student can choose a topic of their choice but the same should be from the syllabi.
2. The students will have to communicate the same to the teacher in advance before delivering the same, and getting the topic approved. The teacher can change, modify, and suggest one instead.
3. The students will be allowed to share their screen and present the same online in laboratory sessions and in additional classes as called by the teacher.
4. Student will also have to submit a written report based on that.
