 3. Fake News Detection- Fake news is sometimes transmitted through the internet by some unauthorised sources, which creates issues for the targeted person and it makes them panic and leads to even violence. Dataset: fake-news kaggle.
 4. Cab Pickups Analysis- cab pickup and distribution, time, days when pickup happens regularly, Dataset: Uber-Pickups dataset.
 5. Price Recommendation for Online Sellers.

- Design ER-Diagram, Create Schema and insert at least 5 records for each table. Add appropriate database constraints

Mini Skill Project 1

Consider the following schema for a Library Database:

BOOK (Book_id, Title, Publisher_Name, Pub_Year)

BOOK_AUTHORS (Book_id, Author_Name)

PUBLISHER (Name, Address, Phone)

BOOK_COPIES (Book_id, Programme_id, No-of_Copies)

BOOK_LENDING (Book_id, Programme_id, Card_No, Date_Out, Due_Date)

LIBRARY_PROGRAMME (Programme_id, Programme_Name, Address)

Write SQL queries to

1. Retrieve details of all books in the library -- id, title, name of publisher, authors, number of copies in each Programme, etc.
2. Get the particulars of borrowers who have borrowed more than 3 books, but from Jan 2017 to Jun 2017.
3. Delete a book in BOOK table. Update the contents of other tables to reflect this data manipulation operation.
4. Partition the BOOK table based on year of publication. Demonstrate its working with a simple query.
5. Create a view of all books and its number of copies that are currently available in the Library.

Mini Skill Project 2

Consider the following schema for Order Database:

SALESMAN (Salesman_id, Name, City, Commission)

CUSTOMER (Customer_id, Cust_Name, City, Grade, Salesman_id)

ORDERS (Ord_No, Purchase_Amt, Ord_Date, Customer_id, Salesman_id)

Write SQL queries to

1. Count the customers with grades above Bangalore's average.
2. Find the name and numbers of all salesman who had more than one customer.
3. List all the salesman and indicate those who have and do not have customers in their cities (Use UNION operation.)
4. Create a view that finds the salesman who has the customer with the highest order of a day.
5. Demonstrate the DELETE operation by removing salesman with id 1000. All his orders must also be deleted.

Mini Skill Project 3

Consider the schema for Movie Database:

ACTOR (Act_id, Act_Name, Act_Gender)

DIRECTOR (Dir_id, Dir_Name, Dir_Phone)

MOVIES (Mov_id, Mov_Title, Mov_Year, Mov_Lang, Dir_id)

MOVIE_CAST (Act_id, Mov_id, Role)

RATING (Mov_id, Rev_Stars)

Write SQL queries to

1. List the titles of all movies directed by 'Hitchcock'.
2. Find the movie names where one or more actors acted in two or more movies.
3. List all actors who acted in a movie before 2000 and in a movie after 2015 (use JOIN operation).
4. Find the title of movies and number of stars for each movie that has at least one rating and find the highest number of stars that movie received. Sort the result by movie title.
5. Update rating of all movies directed by 'Steven Spielberg' to 5.

Mini Skill Project 4

Consider the schema for College Database:

STUDENT (USN, SName, Address, Phone, Gender)

SEMSEC (SSID, Sem, Sec)

CLASS (USN, SSID)

COURSE (Subcode, Title, Sem, Credits)

IAMARKS (USN, Subcode, SSID, Test1, Test2, Test3, FinalIA)

Write SQL queries to

1. List all the student details studying in fourth semester 'C' section.
2. Compute the total number of male and female students in each semester and in each section.
3. Create a view of Test1 marks of student USN '1BI15CS101' in all Courses.
4. Calculate the FinalIA (average of best two test marks) and update the corresponding table for all students.
5. Categorize students based on the following criterion:
If FinalIA = 17 to 20 then CAT = 'Outstanding'
If FinalIA = 12 to 16 then CAT = 'Average'
If FinalIA < 12 then CAT = 'Weak'
Give these details only for 8th semester A, B, and C section students.

Mini Skill Project 5

Consider the schema for Company Database:

EMPLOYEE (SSN, Name, Address, Sex, Salary, SuperSSN, DNo)

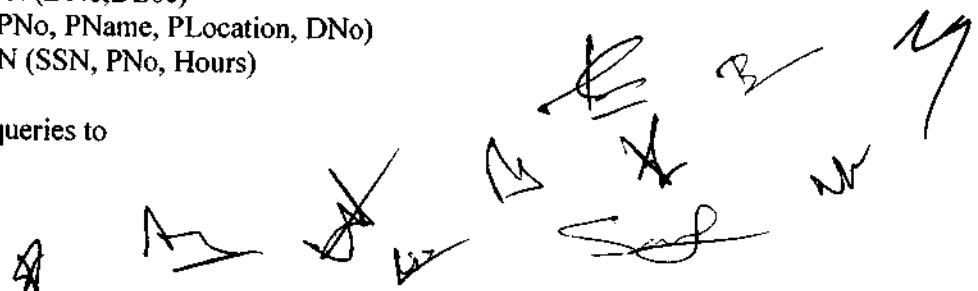

DEPARTMENT (DNo, DName, MgrSSN, MgrStartDate)

DLOCATION (DNo, DLoc)

PROJECT (PNo, PName, PLocation, DNo)

WORKS_ON (SSN, PNo, Hours)

Write SQL queries to

MADHAV INSTITUTE OF TECHNOLOGY & SCIENCE, GWALIOR

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

DEPARTMENT OF INFORMATION TECHNOLOGY

1. Make a list of all project numbers for projects that involve an employee whose last name is 'Scott', either as a worker or as a manager of the department that controls the project.
2. Show the resulting salaries if every employee working on the 'IoT' project is given a 10 percent raise.
3. Find the sum of the salaries of all employees of the 'Accounts' department, as well as the maximum salary, the minimum salary, and the average salary in this department.
4. Retrieve the name of each employee who works on all the projects controlled by department number 5 (use NOT EXISTS operator).
5. For each department that has more than five employees, retrieve the department number and the number of its employees who are making more than Rs. 6,00,000.

Mini Skill Project 6

A university registrar's office maintains data about the following entities:

- (a) courses, including number, title, credits, syllabus, and prerequisites;
- (b) course offerings, including course number, year, semester, section number, instructor(s), timings, and classroom;
- (c) students, including student-id, name, and program; and
- (d) instructors, including identification number, name, department, and title. Further, the enrollment of students in courses and grades awarded to students in each course they are enrolled for must be appropriately modeled.

Construct an E-R diagram for the registrar's office. Document all assumptions that you make about the mapping constraints.

Mini Skill Project 7

Construct an E-R diagram for a car-insurance company whose customers own one or more cars each. Each car has associated with it zero to any number of recorded accidents.

Mini Skill Project 8

Construct an E-R diagram for a hospital with a set of patients and a set of medical doctors. Associate with each patient a log of the various tests and examinations conducted.

Mini Skill Project 9

Design an E-R diagram for keeping track of the exploits of your favourite sports team. You should store the matches played, the scores in each match, the players in each match and individual player statistics for each match. Summary statistics should be modeled as derived attributes.

Mini Skill Project 10

Consider a database used to record the marks that students get in different exams of different course offerings.

- a. Construct an E-R diagram that models exams as entities, and uses a ternary relationship, for the above database.
- b. Construct an alternative E-R diagram that uses only a binary relationship between students and course-offerings. Make sure that only one relationship exists between a particular student and course-offering pair, yet you can represent the marks that a student gets in different exams of a course offering.

LIST OF SKILL BASED MINI PROJECT

1. Write a program to obtain the sum of the first two even digit and last two add digits of integer number given by user .Number has at least 8 digit.
2. Write a program to obtain a number N and increment its value by 1 if the number is divisible by 4 otherwise decrement its value by 1 until we get a prime number.
3. Consider the following 4×4 pattern:

1 2 4 7
3 5 8 11
6 9 12 14
10 13 15 16

You are given an integer N. Write a program to print the N×N pattern of the same kind (containing integers 1 through N²).

4. Following conditions are given based on three subjects marks
 - a. Physics marks must be greater than 50
 - b. Chemistry marks must be greater than 80
 - c. English marks must be greater than 70

Students is awarded grade 10 if all three conditions are met. Grade 9 is given if conditions a and b are met. Grade 8 is given if conditions b and c are met. Grade 7 is given if a and c are met. Grade is 6 if only one condition is met . Grade is 5 if none of the three conditions are met. Write a program to display the grade of students , based on the values of physics , chemistry and English , given by user.

5. Ram and Shyam are playing a game. Ram initially has the number A and Shyam has the number B. There are a total of N turns in the game, and Ram and Shyam alternatively take turns. In each turn the player whose turn it is, multiplies his or her number by 2. Ram has the first turn. Suppose after all the N turns, Ram's number has become C and Shyam's number has become D. 6. An array A of N positive numbers is given. Write a program to find the number of subarrays for which the sum and product of elements are unequal.
7. There's an array A consisting of N non-zero integers $A_{1..N}$. A subarray of A is called alternating if we take any two adjacent elements in it, then one of them should be even and the other should be odd. For each x from 1 to N , write a program to compute the length of the longest alternating subarray that starts at x - that is, a subarray $A_{x..y}$ for the maximum possible $y \geq x$. The length of such a subarray is $y-x+1$.
8. Given an array A_1, A_2, \dots, A_N , count the number of subarrays of array A which are non-decreasing. A subarray $A[i..j]$, where $1 \leq i \leq j \leq N$ is a sequence of integers A_i, A_{i+1}, \dots, A_j . A subarray $A[i..j]$ is non-decreasing if $A_i \leq A_{i+1} \leq A_{i+2} \leq \dots \leq A_j$. Write a program to count the total number of such subarrays.
9. Two strings A and B are given, each consisting of lower case alphabets. Write a program to find whether it is possible to choose some non empty strings s_1 and s_2 where s_1 is a substring of A , s_2 is a substring of B such that $s_1 + s_2$ is a palindromic string. Here '+' denotes the concatenation between the strings. And if there are such strings S_1 and S_2 then print S_1+S_2 .
10. There are N students standing in a row and numbered 1 through N from left to right. You are given a string S with length N , where for each valid i , the i -th character of S is 'x' if the i -th student is a girl or 'y' if this student is a boy. Students standing next to each other in the row are friends. The students are asked to form pairs for a project work. Each pair must consist of a boy and a girl. Two students can only form a pair if they are friends. Each student can only be part of at most one pair. Write a program to find the maximum number of pairs that can be formed.

COURSE CURRICULUM FEEDBACK (by Faculty on MOODLE)

Action / taken (threshold value 3.5)

New programmes (AIML, AIR) have been started from Dec 2020, so as per strength enough books are not available in library but it is already conveyed. As per the scenario, people refer online materials. Our Institute has provided e-learning materials.

Introduction to Artificial Intelligence & Machine Learning and Introduction to Artificial Intelligence are the fundamental subject of AIML and AIR respectively, basic and core subjects knowledge are covered here. Gradually the level and new concepts of programming has incorporated in higher semesters and accordingly syllabus, course content will be updated.

Session wise analysis and impact report: January to April 2022

- Based on the feedback data received from total 305 students and 12 faculty members (fourth semester- IT, IT (AIR), IT (IoT), IT (MAC), IT (EE-IoT) for the academic session January to April 2022, following points have been analysed.
- It has been observed that, in fourth semester 41.09% of students are strongly agreed, 33.16% of students are agreed, 20.12% of students are neutral, 4.76% of students are disagreed and only 0.87% of students are strongly disagreed with the syllabus/ content that they have studied in semester.
- Students have suggested to add new courses such as IoT communication and connections, Database design, SQL, NoSql, Web Development, Design for internet of things, Practical of cloud computing under to meet current needs and Honours.
- Some students have suggested to add some topics such as agile model, Access Controls, Remote Access VPN, Zero Trust Network Access (ZTNA), Data Loss Prevention (DLP), Intrusion Prevention Systems (IPS), Hyperscale Network Security, Cloud Network Security under update course/contents. (Students cover these topics are higher semesters).
- It has been observed that, in fourth semester 42.22% of faculty members are strongly agreed, 37.78% of faculty members are agreed, and 15.55% of faculty members are neutral with the syllabus/ content that they have taught in the fourth semester.

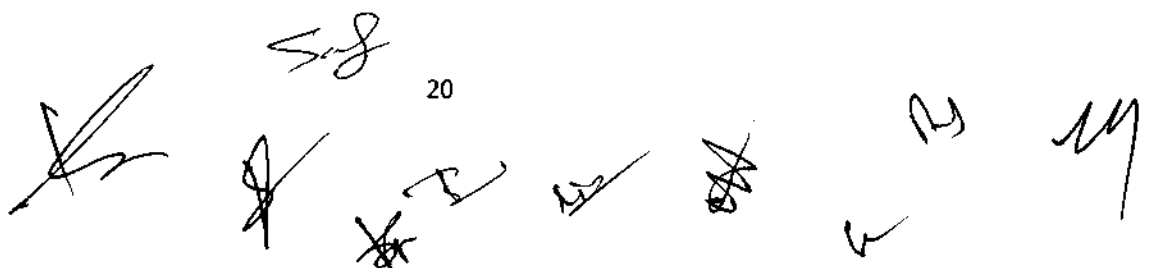

COURSE CURRICULUM FEEDBACK (by Students on MOODLE): Sample Size: 23 (Avg.)

January to April 2022 (IV sem)	Student Feedback (Comments)		Response to student comments / Analysis	Remarks
(230402) Cloud Computing (IoT)	Name course / contents which needs to be updated.	Practical of cloud computing	That matter will put into departmental meeting (consisting of HOD and faculty members) and committee will check the importance of subject and decide. We will do the needful.	Suggestion
(230404) IoT Architectures and Protocols (IoT)	Is any new course required to meet current needs?	IoT communication and connections	This topic is the part of Introduction to IoT, has discussed in brief and in detail will be discussed higher semesters.	
(230403) Software Engineering (IoT)	Name course / contents which needs to be updated.	agile model in 1st unit	This matter was put into BoS meeting and the same will be updated in the subject.	
(230405) Network & Web Security (IoT)	Name course / contents which needs to be updated	Access Controls, Remote Access VPN, Zero Trust Network Access (ZTNA), Data Loss Prevention (DLP), Intrusion Prevention Systems (IPS), Hyperscale Network Security, Cloud Network Security	This matter was put into BoS meeting and the essential topics will be updated in the subject	Suggestion

(220401) Database Management System (EE-IoT)	Mention the course / contents which in your opinion is out dated & needs to be removed.	-As of now mysql isn't much used in industry , oracle is used so instead of mysql , oracle should've been the in the syllabus -More labs are required	Students are free to use any technology (backend end/ database) while designing projects. Faculty members as mentors help them to learn. As per curriculum, mentioned labs are sufficient for that subject but if students need they can use labs to perform experiments related to DBMS in free slots. Faculty members as mentors help them to learn.	
	Name course / contents which needs to be updated	Database design Sql should be taught more	The subject is already a part of syllabus.	
	Is any new course required to meet current needs?	NoSql Web Development	Mini skill project associated with practical subjects enhance think & design capability. Student can use NoSql as backend technology in web development	
	Honours	Design for internet of things	The subject is already a part of syllabus and offered in higher semesters through NPTEL.

Action/ Taken (threshold value 3.5)	MYSQL is open source software required to implement concept of DBMS. Most of the IT companies are working on that technology so it is important for students as well as many applications of higher learning require this technology as prerequisite.
