# **IT Policy**

# Madhav Institute of Technology and Science, Gwalior

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

#### 1. Objectives:

1.1 To ensure the integrity, reliability, accessibility, and superior performance of the Institute IT Infrastructure.

1.2 To ensure that the IT resources shields the official e-identity (allocated by the Institute) of an individual.

1.3 To ensure that all the users of the Institute are responsible for adhering to the procedures governing the implementation of this Policy document and any other matter related to those rules.

**Applicability:** This policy is applicable to all the students & employees of MITS, Gwalior and all others (referred as 'users' in this documents hereon) who use institutional Information Technology (IT) infrastructure (i.e. lab components, desktops/laptops, communication nodes, information technology/information, internet facilities and communication technology (IT/ICT) infrastructure etc.), within the Institute's network and access, transmit or store Institutional and/ or personal information.

**Policy Statement:** IT/ICT resources provided by the institute should only be used for the purpose of teaching, learning and research by the users. It is the responsibility of the users to appropriately use and protect institutional IT resources and to respect the rights of others. This policy is a guideline for safer and legitimate use of such IT resources and infrastructure available.

#### 2. IT Usage and Prohibitions:

2.1 The users of the Institute shall make effective usage of internet, wireless resources, official websites (including Institute website, conference website, journal portals, Institute moodle and course website), Institute Management Systems (IMS) and Swayam/NPTEL portal, Remote Login based facilities of the Institute and e-Library resources.

2.2 The Institute shall stress upon the users to comply with Institute policies and legal obligations (including licenses and contracts).

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

2.3 The Institute shall strive to arrange for awareness programmes to acquaint the users with the effective usage of IT resources.

2.4 Prohibited Use - The users shall not send, view or download fraudulent, harassing, obscene, threatening, or other messages or material that are a violation of applicable law or Institute policy. In particular, contributing to the creation of a hostile academic or work environment is prohibited.

2.5 Social Media - Users must abide by the rules of the Institute towards the usage of social networking sites, mailing lists, news rooms, chat rooms and blogs.

2.6 Commercial Use - The Institute IT resources shall not be used for any commercial and promotional purposes, through advertisements, solicitations or any other message passing medium, except as permitted under Institute rules and other uses approved by the competent authority.

2.7 Copyrights and Licenses - Users must not violate copyright law and must respect licenses to copyrighted materials. For the avoidance of doubt, unlawful file-sharing using the Institute's information resources is a violation of this policy

### 3. Security and Integrity:

3.1 Personal Use - The Institute IT resources should not be used for activities violating the basic functionality and mission of the Institute except in a purely incidental manner.

3.2 The users must refrain from making any unauthorised access of information in order to promote secure access of Network and Computers.

3.3 The competent system administrator may access the information resources for a legitimate purpose.

3.4 Firewall - Additional procedures to maintain a secured flow of internet and intranet based traffic in the campus shall be managed through the use of Unified Threat management (firewall).

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

3.5 Anti-virus and security updates - The regular pupation of the anti-virus policy and security updates should be done for the protection of computing resources.

### 4. IT Asset Management:

4.1 Asset Management: The Institute shall lay down business processes for the management of hardware and software assets that facilitates the usage of IT resources in the Institute. This shall include procedures for managing the purchase, deployment, maintenance, utilization, energy audit, and disposal of software and hardware applications within the Institute.

4.2 Copying and Distribution: The Institute shall ensure that there is no violation in the copying and distribution of proprietary and licensed softwares.

4.3 Risks: The Institute shall stress on managing the risks involved for the usage of IT resources. This shall include standard procedures for identification, minimization and monitoring of risk impact by protective and corrective measures. This should also include procedures for timely data backup, replication and restoring policies, power backups, audit policies, alternate internet connectivity for a fail-safe internet access. 4.4 Open Source Asset: The Institute shall endeavour towards the promotion and effective usage of open source softwares.

## 5. IT Hardware Installation Policy

Institute network user community needs to observe certain precautions while getting their computers or peripherals installed so that he/she may face minimum inconvenience due to interruption of services due to hardware failures.

## A. Who is Primary User

An individual in whose room the computer is installed and is primarily used by him/her, is considered to be "primary" user. If a computer has multiple users, none of whom are considered the "primary" user, the department Head should make an arrangement and make a person responsible for compliance.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

#### **B.** What are End User Computer Systems

Apart from the client PCs used by the users, the Institute will consider servers not directly administered by INTERNET UNIT, as end-user computers. If no primary user can be identified, the department must assume the responsibilities identified for end-users. Computer systems, if any, that are acting as servers which provide services to other users on the Intranet/Internet though registered with the INTERNET UNIT, are still considered under this policy as "end-users" computers.

#### C. Warranty & Annual Maintenance Contract

Computers purchased by any Section/Department/Project should preferably be with 3year on-site comprehensive warranty. After the expiry of warranty, computers should be under annual maintenance contract. Such maintenance should include OS reinstallation and checking virus related problems also.

#### **D.** Network Cable Connection

While connecting the computer to the network, the connecting network cable should be away from any electrical/electronic equipment, as they interfere with the network communication. Further, no other electrical/electronic equipment should be shared with the power supply from where the computer and its peripherals are connected.

#### **E.** Noncompliance

MITS faculty, staff, and students not complying with this computer hardware installation policy may leave themselves and others at risk of network related problems which could result in damaged or lost files, inoperable computer resulting in loss of productivity. An individual's non-compliant computer can have significant, adverse effects on other individuals, groups, departments, or even whole Institute. Hence it is critical to bring all computers into compliance as soon as they are recognized not to be. Noncompliance of the above may attract a punitive action.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

# 6. Software Installation and Licensing Policy

Any computer purchases made by the individual departments/projects should make sure that such computer systems have all licensed software (operating system, antivirus software and necessary application software) installed.

Respecting the anti-piracy laws of the country, Institute IT policy does not allow any pirated/unauthorized software installation on the Institute owned computers and the computers connected to the Institute campus network. In case of any such instances, Institute will hold the department/individual personally responsible for any pirated software installed on the computers located in their department/individuals' rooms.

### A. Operating System and its Updating

**1.** Individual users should make sure that respective computer systems have their OS updated in respective of their service packs/patches, through Internet. This is particularly important for all MS Windows based computers (both PCs and Servers).

2. Institute as a policy encourages user community to go for open source software such as Linux, Open office to be used on their systems wherever possible.

**3.** Any MS Windows OS based computer that is connected to the network should access http://windowsupdate.microsoft.com web site for free updates.

#### **B.** Backups of Data

Individual users should perform regular backups of their vital data. Virus infections often destroy data on an individual's computer. Without proper backups, recovery of destroyed files may be impossible.

Preferably, at the time of OS installation itself, one can have the computer's hard disk partitioned into two volumes typically C and D. OS and other software should be on C drive and user's data files on the D drive. In case of any virus problem, generally only C volume gets corrupted. In such an event formatting only one volume, will protect the data loss. However, it is not a fool proof solution. Apart from this, users should keep their valuable data either on Floppy, or CD or other storage devices such as pen drives.

(A Govt. Aided UGC Autonomous & NAAC Accredited Institute Affiliated to RGPV, Bhopal)

### **C.** Noncompliance

MITS faculty, staff, and students not complying with this computer security policy leave themselves and others at risk of virus infections which could result in damaged or lost files inoperable computer resulting in loss of productivity risk of spread of infection to others confidential data being revealed to unauthorized persons

An individual's non-compliant computer can have significant, adverse effects on other individuals, groups, departments, or even whole Institute. Hence it is critical to bring all computers into compliance as soon as they are recognized not to be.

### 7. Violation of Policy:

Any violation of the basic objectives and areas mentioned under the IT Policy of the Institute shall be considered as a violation and as a misconduct and gross misconduct under Institute Rules. This may attract a penalty/punitive action, if needed.

### 8. Implementation of Policy:

For implementation of IT policy, the Institute will decide necessary rules from time to time.
