It has been a great learning experience. Instructors are working diligently. The flying exercises are well designed, and drone assembly and simulator sessions are well-coordinated. It is a very good place for the drone industry and will open doors for the future of drone pilots!

Patience, knowledge and coordination of the instructors is truly praiseworthy. My experience from day 1 has been extremely positive. The atmosphere, location and support from staff has been fantastic.

Thank you team Drone Destination & IGRUA for setting such a great example for everyone in the training field. I really appreciate the dedication and knowledge of everyone working there. The drones we trained on were extremely stable and I was amazed at their endurance. Even after having flown drones for many years, it was a great learning experience.
